 <p>OUR EYES More than a sight by Keshe Foundation</p> <p>240th Knowledge Seekers Workshop - September 6, 2018 https://youtu.be/lzqGCyz1Gmo?t=6322</p> <p>All our life we have been hearing the expression "I will believe when I see with my own eyes". We have evolved ourselves to understand only the visible matter. And because we are all so physical we have to have something to see as output from Keshe Plasma Science and Technology applications for us to believe in what we are doing.</p> <p>In understanding the totality of the creation of the plasma, from the structure of a neutron, soon we will come to understand we can replicate anything. Now we have a plain camera which is called neutron plasma. If we understand the totality we are all the creator of the destiny of our own. One thing we never realized is that be it the soul of the man, or be it the creation of the soul of the man, one has to understand the limitation of knowledge. The strength of the universe gives man one limitation, validity and dimension of physically being dense to the greatest knowledge of the man in the dimension of existence.</p> <p>But do we really need the hands to create and feel? Why was the eye chosen to see? The physicality of the creation through the eye is much easier than through the hand. "The eye is a path to your soul, why don't you use the soul through the eye to create what you want? Even be it another soul. Man will understand much faster this way." The position of the soul and the eye of the man in the dimension of vision can be used to transfer directly the energy of the soul of man to what physicality of man wants to manifest itself or to be manifested for itself. "If somebody tells you about the rib and Adam and Eve I can show you it is much easier through the eye of the man to create the Eve."</p> <p>The man has chosen the physical condition to express the existence of its soul in the condition of the existence of this planet in the solar system and within the galaxy. That extends the life of the man to the life of the universe and not to rotation of the planet around itself. Once we understand how to apply the interaction of the fields, then by the interaction of the fields of the neutron, the plasma neutron, dictates the creation of entity as we like. "I know if you who can reach the level of understanding, even create the what I call, gleamatic magnetic fields of the soul of the man, even be it yourself. This will come and bring Man to a new dimension of understanding."</p>	 <p>NOS YEUX Plus que la vision Par la Keshe Foundation</p> <p>240ème Knowledge Seekers Workshop - 06 Septembre 2018 https://youtu.be/lzqGCyz1Gmo?t=6322</p> <p>Toute notre vie, nous avons entendu : "Je ne crois que ce que je vois". Nous n'avons appris à voir que la matière visible. Et parce que nous</p>
Our Eyes More than a sight By Keshe Foundation 240th Knowledge Seekers Workshop - September 6, 2018 https://youtu.be/lzqGCyz1Gmo?t=6322	Nos Yeux, Plus que la vision Par la Keshe Foundation 240ème Knowledge Seekers Workshop - 06 Septembre 2018 https://youtu.be/lzqGCyz1Gmo?t=6322
All our life we have been hearing the expression "I will believe when I see with my own eyes". We have evolved ourselves to understand only the	Toute notre vie, nous avons entendu : "Je ne crois que ce que je vois". Nous n'avons appris à voir que la matière visible. Et parce que nous

visible matter. And because we are all so physical we have to have something to see as output from Keshe Plasma Science and Technology applications for us to believe in what we are doing.	sommes si physiques, nous avons quelque chose à apprendre des applications de la Keshe Plasma Science et de la Keshe Technology afin que nous puissions croire en ce que nous faisons.
In understanding the totality of the creation of the plasma, from the structure of a neutron, soon we will come to understand we can replicate anything. Now we have a plain canvas which is called neutron plasma. If we understand the totality we are all the creator of the destiny of our own. One thing we never realized is that be it the soul of the man, or be it the creator of the soul of the man, one has to understand the limitation of knowledge. The strength of the universe gives man one limitation; visibility and dimension of physicality bring demise to the present knowledge of the man in the dimension of existence.	En comprenant la totalité de la création du plasma, à partir de la structure d'un neutron, nous en viendrons bientôt à comprendre que nous pouvons tout reproduire. Nous avons maintenant un canevas appelé Neutron Plasma. Si nous comprenons la totalité, nous sommes tous les créateurs de notre propre destin. Une chose que nous n'avons jamais comprise : que ce soit l'âme de l'homme ou que ce soit le créateur de l'âme de l'homme, il faut saisir les limites de la connaissance. L'univers donne à l'homme une limite ; la vision et la dimension de la physicalité noient la connaissance réelle de l'homme dans la dimension de l'existence.
But do we really need the hands to create and feel? Why was the eye chosen to see? The physicality of the creation through the eye is much easier than through the hand. "The eye is a path to your soul, why don't you use the soul through the eye to create what you want? Even be it another soul. Man will understand much faster this way."	Mais avons-nous vraiment besoin des mains pour créer et sentir ? Pourquoi l'œil a-t-il été choisi pour voir ? Appréhender la physicalité par l'œil est beaucoup plus facile que par la main. "L'œil est un chemin vers l'âme. Pourquoi ne pas utiliser l'âme par l'œil pour créer ce que vous voulez ? Même une autre âme. L'homme comprendrait beaucoup plus vite de cette façon."
The position of the soul and the eye of the man in the dimension of vision can be used to transfer directly the energy of the soul of man to what physicality of man wants to manifest itself or to be manifested for itself. "If somebody tells you about the rib and Adam and Eve I can show you it is much easier through the eye of the man to create the Eve."	L'âme et l'œil de l'homme dans la dimension de la vision peuvent être utilisée pour transférer directement l'énergie de l'âme de l'homme à ce que la physicalité de l'homme veut se manifester ou être manifestée pour elle-même. "Si quelqu'un vous parle de la côte et d'Adam et Eve, je peux vous montrer qu'il est beaucoup plus facile de créer l'Eve à travers l'œil de l'homme."
If you were looking to put two hands together in order to create physical matter, then look through the eye of the man. It is again two, the left eye and the right eye. One is gravitational, one is magnetical. If we manage to understand the true work of the eye of the man, then we will understand that we can create anything through our eyes. Yet, there is one important detail to remember.	Si vous cherchez à utiliser vos deux mains pour créer de la matière physique, alors regardez plutôt par l'œil de l'homme. Ils sont deux également, l'œil gauche et l'œil droit. L'un est gravitationnel, l'autre est magnétique. Si nous parvenons à comprendre le véritable travail de l'œil de l'homme, alors nous comprendrons que nous pouvons tout créer par nos yeux. Cependant, il y a un détail important à retenir.
"The eye of the soul does not need the eye of the man. It's easier to do, it's much easier to do because first of all you don't transform so much	"L'œil de l'âme n'a pas besoin de l'œil de l'homme. C'est plus facile à faire, beaucoup plus facile à faire parce que tout d'abord vous ne

energy in the dimension of the matter state, but you transfer energy in the dimension of the strength of the soul without interfering with the soul.”	transformez pas tant d'énergie dans la dimension de l'état de matière, mais vous transférez de l'énergie dans la dimension de la force de l'âme sans interférer avec l'âme.”
Long-time passengers of Universe have been across this planet and have taken its beauty with them. But they have not taken any plants. They have understood the structure of the strength of the soul of the plants and have replicated it. It is very much that there is no Copper sent and thrown from the Sun on to Earth, but the conditions are created that the Copper lands on Earth and it accepts its condition of being where it is according to the environment that it's creating.	Les voyageurs d'il y a longtemps de l'Univers sont passés sur cette planète et ils ont emporté sa beauté avec eux. Mais, ils n'ont pris aucune plante. Ils ont compris la structure de la force de l'âme des plantes et l'ont répliquée. Il est vrai qu'il n'y a pas de cuivre envoyé et projeté du Soleil sur la Terre, mais les conditions sont créées pour que le cuivre atterrisse sur la Terre et qu'il accepte sa condition d'être là où il est en fonction de l'environnement qu'il crée.
The man has chosen the physical condition to express the existence of its soul in the condition of the existence of this planet in the solar system and within the galaxy. That extends the life of the man to the life of the universe and not to rotation of this planet around itself. Once we understand how to apply the interaction of the fields, then by the interaction of the fields of the neutron, the plasma neutron, dictates the creation of entity as we like. “Those of you who can reach the level of understanding... even create the, what I call, plasmatic magnetic fields of the soul of the man, even be it yourself. This will come and bring Man to a new dimension of understanding.”	L'homme a choisi la physicalité pour exprimer l'existence de son âme sur cette planète du système solaire et dans la galaxie. Cela connecte la vie de l'homme à la vie de l'univers et non à la rotation de cette planète autour d'elle-même. Une fois que nous aurons compris comment appliquer l'interaction des champs, alors par l'interaction des champs du neutron, le Neutron Plasma, nous créerons toutes les entités que nous voulons. “Ceux d'entre vous qui peuvent atteindre ce niveau de compréhension ... créeront les, ce que j'appelle, plasmatic magnetic fields de l'âme de l'homme, même pour eux-mêmes. Cela viendra et amènera l'Homme à une nouvelle dimension de compréhension.”

How does man communicate in the space? What we know as the language of man, known as English, African, Spanish, Japanese or any other is the conversion of the soul of understanding of certain condition into the understanding of the vocabulary or the sound which manifests itself to:

In our body, we have a conversion unit, an inverter unit, which converts everything to one point. From that point, it becomes the language. We have to go to that point before the conversion, before the language and the thoughts are converted.

It is not just the language we must take in consideration, but also the thoughts. We think, we speak, we imagine, we develop, we laugh, we joy within that language. But what is the language before that inversion before we convert the strength of the soul into the language?

In many of my teachings I refer back and I've said: What do the babies communicate? In what language? They know each other's position, does not matter you bring a Chinese child, bring an English child, bring an Iranian one, bring one from Africa and put them next to each other. Within a few hours, they find their hierarchy, what they like about each other, what they don't like. None of them speaks a language, none of them understands English or French but they understand: the vocabulary voice, but between them, they communicate. The communication of the language of the child at birth is the language of the soul of the man." Mufson S. Koshel

We all know it and yet we are all looking for this mysterious way how the souls communicate. At birth there is no language, but you put babies next to each other you see their reactions, their hierarchy, what they enjoy about each other, do they like to touch each other? Man comes to understand his soul has a strength and it's understood, but the physicality of another. This is the basis before the conversion, before we put the inverter of the language into it. This is the language of the man's soul.

Many people at birth or prior to birth they have blue eyes. Why? We see them going through ages and then the color of the eye changes from blue in the age of two, three, four. This is the transformation of the soul, the strength of the soul through the eye of the man, the color blue.

At a certain point when we die in many cases, you can see the soul of the man back through the eye of the man with the color blue. We relate this to the understanding of the soul at the level of the planet Earth at the creation of the planet. If you put a fish, a chicken, a man, a dog, a horse, a baby at just prior to point of birth do they all understand the same language? Because they all carry the same soul, nothing has tempered with its purity.

Where do we see the soul of the man in respect to the soul of the Earth? Are we aware at the level of the solar strength about

Le Langage de l'Univers L'avons-nous oublié ? Par la Keshe Foundation

Comment l'homme communique-t-il dans l'espace ? Ce que nous connaissons comme le langage : Anglais, Africains, Espagnol, Japonais, etc. est la conversion de l'âme de compréhension d'une certaine condition en la compréhension d'un vocabulaire ou d'un son qui se manifeste.

Dans notre corps, nous avons une unité de conversion et une d'inversion, qui convertit tout en un point. À partir de ce point, cela devient le langage. Nous devons accéder à ce point avant la conversion, avant que le langage et les pensées soient converties.

Le langage mais aussi les pensées sont à prendre en compte. Nous pensons, nous parlons, nous imaginons, nous nous développons, nous rions, nous nous réjouissons dans cette langue. Mais, qu'est-ce-que le langage avant l'inversion, avant

the strength of the soul into this language?	la conversion de la force de l'âme en ce langage ?
<p>"In many of my teachings I refer back and I've said: What do the babies communicate? In what language? They know each other's position; does not matter you bring a Chinese child, bring an English child, bring an Iranian one, bring one from Africa and put them next to each other. Within a few hours, they find their hierarchy, what they like about each other, what they don't like. None of them speaks a language, none of them understands English or French but they understand the vocabulary voice, but between them, they communicate. The communication of the language of the child at birth is the language of the soul of the man." Mehran T. Keshe</p>	<p>"Je me réfère à mes nombreux enseignements où j'ai dit : Comment les bébés communiquent ? Dans quelle langue ? Ils connaissent la position de chacun ; peu importe que vous ameniez un enfant chinois, anglais, iranien, africain et que vous les mettiez les uns à côté des autres. En quelques heures, ils trouvent leur hiérarchie, ce qu'ils aiment et n'aiment pas chez les uns et les autres. Ils ne parlent aucune langue, aucun ne comprend l'anglais ou le français. Ils comprennent la voix du vocabulaire, mais entre eux, ils communiquent. La communication dans la langue de l'enfant à la naissance se fait dans la langue de l'âme de l'homme." Mehran T. Keshe</p>
<p>We all know it and yet we are all looking for this mysterious way how the souls communicate. At birth there is no language, but you put babies next to each other you see their reactions, their hierarchy, what they enjoy about each other, do they like to touch each other? Man comes to understand his soul has a strength and it's understood, but the physicality of another. This is the basic before the conversion, before we put the inverter of the language into it. This is the language of the man's soul.</p>	<p>Nous le savons tous et pourtant nous cherchons tous cette mystérieuse façon dont les âmes communiquent. À la naissance, aucun langage, mais en mettant les bébés les uns à côté des autres, on voit leurs réactions, leur hiérarchie, ce qu'ils aiment chez les autres, aiment-ils se toucher ? L'homme en vient à comprendre que son âme a une force et qu'elle est comprise, mais la physicalité d'une autre. C'est la base avant la conversion, avant que nous y mettions l'inverseur de la langue. C'est la langue de l'âme de l'homme.</p>
<p>Many people at birth or prior to birth they have blue eyes. Why? We see them going through ages and then the color of the eye changes from blue in the age of two, three, four... This is the transformation of the soul, the strength of the soul through the eye of the man, the color blue.</p>	<p>Beaucoup de bébés ont les yeux bleus à la naissance ou même avant. Pourquoi ? Ils vieillissent et puis la couleur de l'œil change du bleu à l'âge de deux, trois, quatre ans ... C'est la transformation de l'âme, la force de l'âme à travers l'œil de l'homme, la couleur bleue.</p>
<p>At a certain point when we die in many cases, you can see the soul of the man back through the eye of the man with the color blue. We relate this to the understanding of the soul at the level of the planet Earth at the creation of this planet. If you put a fish, a chicken, a man, a dog, a horse, a baby at just prior to point of birth do they all understand the same language? Because they all carry the same soul, nothing has tampered with its purity.</p>	<p>À un certain moment lorsque nous mourons et dans de nombreux cas, vous pouvez voir l'âme de l'homme à travers l'œil de l'homme de couleur bleue. Cela est en relation avec la compréhension de l'âme au niveau de la planète Terre, lors de la création de cette planète. Si vous mettez un poisson, un poulet, un homme, un chien, un cheval, un bébé juste avant la naissance, comprennent-ils tous la même langue ? Parce qu'ils portent tous la même âme, rien n'a altéré sa pureté.</p>

By Keshe Foundation

the feeling of the planet? Does the soul of the planet, does the soul of the solar system and the galaxy speak to our soul? Do we become aware and when there is something strange happening in distance, but we have come to ignore it? Do we have to create and understand a new dimension in the understanding of the language of the universe which is within our soul as we have been created out of it, it cannot be any other.

This will become the main point for those who call themselves travelers of the space. In what language do you speak to the man from planet Zeus, as he will not know French or English or Farsi or Arabic or German or any of the languages we use on Earth. The Universal Community speaks and communicates with each other. All of us know this language because we were born with it, but we forgot.

We come back to the point of understanding where we ask ourselves: do we need to learn a new language? As we become the man of a space we need to understand we already know this language. "It is not our mother tongue, it is our universal tongue." When the man becomes aware of the condition of the

space travels within the plane of the universe, when the man does not need the dimension of physicality then man will start to speak the language of the space, the language of the soul of the space.

When we experience interruptions during live transmissions, during phone conversations it gives us the reason to think and go back to remember how we communicated in the first days of our lives on the planet? We could feel everything. We did not have the eyes to see but we knew we are in the hands of someone, we knew that physically we are getting handled. Somebody is hugging and kissing and doing what is needed for us.

The soul of the animals becomes aware at a point of birth because they have to see and to recognize their environment immediately as their life depends on it. The language of the soul expands or does the language of the soul become converted into this space of dimension? Do we have the same thing in our dimension of the soul in respect to our environment?

We say now this language is no use here, I have converted it.

There is a passage between the two chambers of the heart that at the point of inception, at birth it switches to it. The first time you breathe the air in, it closes. Is that second switching over of the physicality to the handover of the switch or the soul of the man connecting the physical dimension into the life of the man or the soul of the man?

Has our body made that switch and is built into it or is it just that the blood flow changes with us as we are being born and separated from the mother's heart?

Understanding the language of the soul and for all of us knowing it becomes one of the cornerstones of the knowledge of the space.

the feeling of the planet? Does the soul of the planet, does the soul of the solar system and the galaxy speak to our soul? Do we become aware and when there is something strange happening in distance, but we have come to ignore it? Do we have to create and understand a new dimension in the understanding of the language of the universe which is within our soul as we have been created out of it, it cannot be any other.

This will become the main point for those who call themselves travelers of the space. In what language do you speak to the man from planet Zeus, as he will not know French or English or Farsi or Arabic or German or any of the languages we use on Earth. The Universal Community speaks and communicates with each other. All of us know this language because we were born with it, but we forgot.

We come back to the point of understanding where we ask ourselves: do we need to learn a new language? As we become the man of a space we need to understand we already know this language. "It is not our mother tongue, it is our universal tongue." When the man becomes aware of the condition of the

space travels within the plane of the universe, when the man does not need the dimension of physicality then man will start to speak the language of the space, the language of the soul of the space.

When we experience interruptions during live transmissions, during phone conversations it gives us the reason to think and go back to remember how we communicated in the first days of our lives on the planet? We could feel everything. We did not have the eyes to see but we knew we are in the hands of someone, we knew that physically we are getting handled. Somebody is hugging and kissing and doing what is needed for us.

The soul of the animals becomes aware at a point of birth because they have to see and to recognize their environment immediately as their life depends on it. The language of the soul expands or does the language of the soul become converted into this space of dimension? Do we have the same thing in our dimension of the soul in respect to our environment?

We say now this language is no use here, I have converted it.

There is a passage between the two chambers of the heart that at the point of inception, at birth it switches to it. The first time you breathe the air in, it closes. Understanding the language of the soul and for all of us knowing it becomes one of the cornerstones of the knowledge of the space.

WWW.KESHEFOUNDATION.ORG

Where do we see the soul of the man in respect to the soul of the Earth? Are we aware at the level of the solar strength about the feeling of the planet? Does the soul of the planet, does the soul of the solar system and the galaxy speak to our soul? Do we become aware and when there is something strange happening in distance, but we have come to ignore it? Do we have to create and understand a new dimension in the understanding of the language of the universe which is within our soul as we have been created out of it; it cannot be any other.

This will become the main point for those who call themselves travelers of the space. In what language do you speak to the man from planet Zeus, as he will not know French or English or Farsi or Arabic or German or any of the languages we use on Earth. The Universal Community speaks and communicates with each other. All of us know this language because we were born with it, but we forgot.

Où voyons-nous l'âme de l'homme par rapport à l'âme de la Terre ? Sommes-nous conscients de la sensation de la planète par rapport à la force solaire ? L'âme de la planète, l'âme du système solaire et de la galaxie parlent-elles à notre âme ? Prenons-nous conscience du déroulement de quelque chose d'étrange à distance, mais que nous ne l'avons pas senti ? Devons-nous créer et comprendre une nouvelle dimension dans la compréhension du langage de l'univers qui est dans notre âme car nous avons été créés à partir d'elle ? Il ne peut en être autrement.

Cela deviendra inévitable pour ceux qui se disent voyageurs de l'espace. Dans quelle langue parlerez-vous à l'homme de la planète Zeus. Il ne connaîtra ni le français, ni l'anglais, ni le farsi, ni l'arabe, ni l'allemand, ni aucune des langues utilisées sur Terre. Les membres de la Universal Community parle et communique entre eux. Nous connaissons tous cette langue car nous sommes nés avec elle, mais nous l'avons oubliée.

<p>We come back to the point of understanding where we ask ourselves: do we need to learn a new language? As we become the men of a space we need to understand we already know this language. "It is not our mother tongue, it is our universal tongue." When the man becomes aware of the condition of the space travels within the plasma of the universe, when the man does not need the dimension of physicality then man will start to speak the language of the space, the language of the soul of the space.</p>	<p>Nous en revenons à la question : Avons-nous besoin d'apprendre une nouvelle langue ? En devenant les hommes d'un espace que nous devons comprendre, nous connaissons déjà cette langue. "Ce n'est pas notre langue maternelle, c'est notre langue universelle." Lorsque l'homme prend conscience des conditions des voyages spatiaux dans le plasma de l'univers, lorsque l'homme n'a pas besoin de la physicalité, alors l'homme commencera à parler le langage de l'espace, le langage de l'âme de l'espace.</p>
<p>When we experience interruptions during live transmissions, during phone conversations it give us the reason to think and go back to remember how we communicated in the first days of our lives on this planet? We could feel everything. We did not have the eyes to see but we knew we are in the hands of someone, we knew that physically we are getting handled. Somebody is hugging and kissing and doing what is needed for us.</p>	<p>Les transmissions en direct ou les conversations téléphoniques interrompues doivent nous mener à réfléchir et à revenir en arrière. Comment communiquons-nous dans les premiers jours de nos vies sur cette planète ? Nous pouvions tout ressentir. Nous n'avions pas d'yeux pour voir. Mais nous savions que nous étions entre les mains de quelqu'un. Nous savions qu'on nous manipulait physiquement. Quelqu'un nous enlaçait et nous embrassait et s'occupait de nous.</p>
<p>The soul of the animals becomes aware at a point of birth because they have to see and to recognize their environment immediately as their life depends on it. The language of the soul expands or does the language of the soul become converter into this space of dimension? Do we have the same thing in our dimension of the soul in respect to our environment?</p>	<p>L'âme des animaux prend conscience au moment de la naissance car ils doivent voir et reconnaître immédiatement leur environnement car leur vie en dépend. Est-ce-que le langage de l'âme se développe ou devient-il un convertisseur dans cette dimension de l'espace ? Avons-nous la même chose dans notre dimension de l'âme par rapport à notre environnement ?</p>
<p>We say now this language is no use here, I have converted it.</p>	<p>On dit maintenant que cette langue n'est pas utile ici, je l'ai convertie.</p>
<p>There is a passage between the two chambers of the heart that at the point of inception, at birth it switches to it. The first time you breathe the air in, it closes. Is that second switching over of the physicality to the handover of the switch or the soul of the man connecting the physical dimension into the life of the man or the soul of the man?</p>	<p>Il y a un passage entre les deux ventricules du cœur qui, à la naissance, la première fois que vous respirez, se referme. Est-ce la deuxième connexion à la physicalité qui provoque la fermeture du passage ou l'âme de l'homme qui se connecte à la dimension physique de la vie de l'homme ou à l'âme de l'homme ?</p>
<p>Has our body made that switch and is built into it or is it just that the blood flow changes with us as are we being born and separated from the mother's heart?</p>	<p>Notre corps a-t-il fait ce changement et y est-il intégré ou est-ce simplement que le flux sanguin change comme nous naissons et sommes séparés du cœur de la mère ?</p>
<p>Understanding the language of the soul and for all of us knowing it becomes one of the cornerstones of the knowledge of the space.</p>	<p>La compréhension du langage de l'âme et, pour nous tous, le connaître devient l'une des pierres angulaires de la connaissance de l'espace.</p>

It is as when you are walking into the Spanish bar and you only speak Arabic. It does not matter what hand figures you make, it is not understood. You smile, they reply. You shout, they shout back. Our soul, when we become part of the man of space, we will have this problem for our physicality. We have to understand the dimension of physicality we are born in.

We look at the manifestation of the man at the point of birth but in the dimension of the universe, we look at the manifestation of the man at the completion of the main brain which the soul of man established.

It is mature. Man recognizes the environment he can respond to it, can grow according to it, it reflects and indicates what he likes within it. It is time for us to go back to the point of birth and find the communication language we were born with and we forgot. That language becomes the lower level in understanding the language of the universe and the galaxies and beyond.

In earlier teachings Mahan T. Keshu used to draw the spiral expanding from the center out, the same goes with the language of the universe there is no difference. It is all the same principle.

If you look at the whole structure this is still the same. (Figure 1) If you look at the totality of the language of the universe man's language is (1), galaxy's and language is (2), the universe is (3), Universe in different strengths is (4) and the soul of the Creator (5).

Everything from it is created according to their strength. But if you look they are all contained on the same line, it is a common denominator of the strength. As much as it communicates out, it receives back in the strength of the soul of the creator, non-linguistic, but in the dimension of the best strength of the universe. (Figure 2)

C'est comme si vous entrez dans un bar espagnol et que vous ne parlez que l'arabe. Peu importe ce que vous dites, vous ne serez pas compris. Mais, si vous souriez, ils vous répondent. Si vous criez, ils crieront. Dans l'Âme de l'homme de l'espace, nous aurons ce problème avec notre physicalité. Nous devons comprendre la dimension de la physicalité dans laquelle nous sommes nés.

Nous regardons la présence de l'homme à sa naissance. Mais, dans la dimension de l'univers, nous regardons la présence de l'homme à l'état du cerveau principal que l'âme de l'homme a créé.

Elle est mature. L'homme reconnaît l'environnement, il peut y répondre, il peut grandir en fonction de lui, il reflète et indique ce qu'il aime en lui. Revenons à notre naissance et retrouvons le langage avec lequel nous sommes nés et que nous avons oublié. Ce langage devient le niveau inférieur dans la compréhension du

<p>universe and the galaxies and beyond.</p> <p>In earlier teachings Mehran T. Keshe used to draw the spiral expanding from the center out, the same goes with the language of the universe there is no difference. It is all the same principle.</p>	<p>langage de l'univers et des galaxies et au-delà.</p> <p>Dans ces enseignements passés, Mehran T. Keshe dessinait toujours une spirale qui s'étend du centre vers l'extérieur, il en va de même pour le langage de l'univers : c'est la même chose. C'est le même principe.</p>
<p>If you look at the whole structure this is still the same. (Figure 1) If you look at the totality of the language of the universe man's language is (1), galaxy's soul language is (2), the universe is (3), Unicos in different strengths is (4) and the soul of the Creator (5)</p>	<p>Si vous regardez l'ensemble de la structure, c'est toujours la même chose. (Figure 1) Si vous regardez la totalité du langage de l'univers, le langage de l'homme est (1), le langage de l'âme de la galaxie est (2), l'univers est (3), Unicos en différentes forces est (4) et l'âme du Créateur (5)</p>
 <p><i>Figure 1: The totality of the language of the universe</i></p>	
<p>Everything from it is created according to their strength. But if you look they are all contained on the same line, it is a common denominator of the strength. As much as it communicates out, it receives back in the strength of the soul of the creator; non-tangibility, but in the dimension of the field strength of the universe. (Figure 2)</p>	<p>Tout ce qui en découle est créé en fonction de leur force. Mais, ils sont tous contenus sur la même ligne, c'est un dénominateur commun de la force. Autant ils communiquent, autant ils reçoivent en retour dans la force de l'âme du créateur ; non-tangibilité, mais dans la dimension du champ de force de l'univers. (Figure 2)</p>

Flaming of the Ultraviolet

Spaceship with the dimension of the plasma according to the neutron energy level of the plasma

Figure 3: Slide in a spaceship traveling the span of the universe are speaking the same strength

Man does not need to learn a new language to become a passenger to the universe. When we put a man in the plasma of the universe and we create in our spaceship the dimension of the plasma according to the neutron energy level of the plasma, our souls speak the same strength, our soul has the same strength and thoughts (Figure 3).

Would it be surprising if you meet a man or a creature from another planet who works on this dimension and you know its language because he speaks the same as you?

You communicate at the strength of the galaxy and then maybe you have to learn something from the strength of the universe if you don't understand this language. "Then you have to go to inner yourself to find the strength that - the higher - that he is made of, he can communicate with and what you can convert his to yours that you can understand him?"

The other point comes when we come to these dimensions, would we see the people of other dimensions?

Would we observe them not seeing with the eye of the man, but seeing in observation of the soul of the man?

If we start measuring the strength of the emotion of the man, we will see many scientists have gone to that point, they are testing and are developing tools and methods to test. This will help to see the reaction, to measure the wave in what is now called the frequency, because the wave of the soul in interaction with the material status of the brain of the man needs penetration and that penetration is known as a frequency or Hertz.

We measure the strength of the field, in the totality of the knowledge of physics, this is the gravitational magnetic field strength when it hits a block. It can be the brain of the man, a copper wire, or any material, it has to penetrate as it cannot go through it. Thus it has to find a way to go.

At a specific strength, the magnetic gravitational field can get through various mediums and present science calls it the frequency or wavelength. Scientists are increasingly developing ways to measure their emotion, their feeling, their response.

What will be the first message you would like to communicate using the language of the universe?

LISTEN, RESEARCH, AND UNDERSTAND!
By Keshe Foundation

Keshe Plasma Science and Technology is a new science with yet vast unexplored terrain. It applies to any process and any living being on Earth and beyond. It follows the natural way of Creation opening countless solutions to our complicated lives.

Everyone is excited to start the experiments that will step by step take us to the understanding of the works of Unicos. But along the way, we will meet many challenges. One of them is the preparation stage. What does this mean you might ask?

As with any other sciences humans experienced, there is an initial step which requires research, investigation, learning about the process before applying it in practice.

With this said, the scientist within you has to understand what is the purpose of the experiment, what are you using it for, where you are placing it,

what you are the elements and configurations you are playing with and what is the reason you are using anything in any shape or form. In current society, we have easy access to a lot of materials, but before one starts using them, one must understand what they do.

"Some of you used Lead (Pb) GANs on your coils and some of you use in your beds and you try, it's heavier, attracts energy and you have it. But you have to understand lead has an affinity in the strength to Zinc (Zn). And it touches your emotion."

As Mehvan Tavakoli Keshe explained in the 240th Knowledge Seekers Workshop on September 8th, 2018, the affinity of Lead to Zinc is in a plasmaic magnetic field strength, not in any other direction. When using lead in your coils or in your beds, or somewhere in the house, one has to understand, it has strengths and affinity to absorb more gravitational, therefore it will affect one's emotion.

Écoutez, Recherchez et Comprenez !

Par la Keshe Foundation

La Keshe Plasma Science and Technology est une science nouvelle au vaste terrain encore inexploré. Elle s'applique à tous les processus et êtres vivants sur Terre et au-delà. Elle suit le chemin naturel de la Création en ouvrant des solutions innombrables à nos vies compliquées.

Chacun est impatient de commencer le chemin qui mènent pas à pas à la compréhension des œuvres de l'Unicos. En cours de route, nous allons relever de nombreux défis. L'un d'entre eux est la préparation. Vous êtes en droit de poser la question : Qu'est-ce que cela signifie ?

Comme pour toutes les autres sciences que l'humain expérimente, il y a une première étape qui nécessite recherches, investigations et apprentissage avant de le mettre en pratique.

Cela étant dit, le scientifique qui est en vous doit comprendre quel est le but de l'expérience, à

experiment, what are you using it for, where you are placing it, what you are the elements and configurations you are playing with and what is the reason you are using anything in any shape or form.	quoi vous allez l'utiliser, où vous la placez, quels sont les éléments et les configurations avec lesquels vous jouez et quelle est la raison pour laquelle vous utilisez quelque chose sous quelque forme que ce soit.
In current society, we have easy access to a lot of materials, but before one starts using them, one must understand what they do.	Dans notre société, nombre de matériaux sont facilement accessibles, mais avant de commencer à les utiliser, il faut comprendre ce qu'ils font.
"Some of you used Lead (Pb) GANS on your coils and some of you use in your beads and you try, it's heavier, attracts energy and you have it. But you have to understand lead has an affinity in the strength to Zinc (Zn). And it touches your emotion."	"Certains d'entre vous ont utilisé des GANS de plomb (Pb) sur leurs bobines et d'autres sur leurs perles et vous essayez, c'est plus lourd, cela attire l'énergie et vous l'avez. Mais, vous devez comprendre que le plomb a une affinité de force avec le zinc (Zn). Et il touche votre émotion."
As Mehran Tavakoli Keshe explained in the 240th Knowledge Seekers Workshop on September 6th, 2018, the affinity of Lead to Zinc is in a plasmatic magnetic field strength, not in any other direction. When using lead in your coils or in your beads, or somewhere in the house, one has to understand, it has strengths and affinity to absorb more gravitational, therefore it will affect one's emotion.	Comme l'a expliqué MT Keshe lors du 240 ^{ème} Knowledge Seekers Workshop le 06 septembre 2018, l'affinité du plomb avec le zinc se situe dans la force d'un champ magnétique plasmatique et non autrement. Lorsque vous utilisez du plomb sur vos bobines ou sur vos perles ou quelque part dans la maison, il faut comprendre qu'il a des forces et une affinité pour absorber plus de gravitationnel, donc qu'il affectera l'émotion.

Page 09 KF NEWS

If someone feels depressed or has the ability to be depressed, the Lead will affect that person emotionally, although it does not affect the others which do not have this inclination towards depression. If someone is psychologically not stable, Lead affects that person, although it does not affect the rest of the humanity.

The Earth is full of Lead everywhere. If it would influence on every being inhabiting this planet, we will all feel its effects. The condition of psychological instability allows Lead to influence one's state of being.

"You have to see what it does to you. If you are a schizophrenic you call it, or you are of those beautiful people, it might affect one of the souls within you which then affects your characteristics in that dimension, not the other souls.

So, if you play with Iodine (I) or you use another fancy element Manganese, or whatever and you feel effects you, you have to find out how, in what strength, it interacts with Magnesium (Mg). [] if it makes you feel physically effects connections between the Zinc and Magnesium."

When you have done your research and understand the interactions on the glasmatic field strength level, then you do not use those elements that you know it will have unwanted effects on you. This preparation step brings with it the understanding of the totality of this new science.

Know what you want to use the elements for and understand what effect to expect from it because it might just not give you the effect you are looking for. "You might have understood the need of it for that place not to be but you're forcing it to place it."

Listen, research, and understand! And if you do not find your answers, the PUBLIC TEACHING IN ENGLISH - KNOWLEDGE SEEKERS WORKSHOP are live for you every Thursday at 09:30 CET for your questions to be addressed and answered.

So, if you play with Iodine (I) or you use another fancy element Manganese, or whatever and you feel effects you, you have to find out how, in what strength, it interacts with Magnesium (Mg). [] if it makes you feel physically effects connections between the Zinc and Magnesium."

Si une personne se sent déprimée ou est susceptible de l'être, le plomb l'affectera émotionnellement, mais il n'affectera pas les autres qui n'ont pas cette inclination à la dépression. Si une personne est instable psychologiquement, le plomb l'affectera, mais n'affectera pas le reste de l'humanité.

La Terre est partout pleine de plomb. S'il avait une influence sur chaque être vivant sur cette planète, nous en ressentirions tous les effets. La condition d'instabilité psychologique permet au Plomb d'influencer l'état d'un être.

"Vous devez voir ce qu'il vous fait à vous. Si vous êtes schizophrène, vous l'appellerez. Si vous êtes une magnifique personne, il peut affecter l'une de vos âmes, affectant alors vos caractéristiques dans cette dimension et non les autres âmes.

Si vous prenez de l'iode (I) ou un autre élément proche du titane ou autre et que vous sentez un

feel... affects you, you have to find out how, in what strength. It interacts with Magnesium (Mg), [...] if it makes you tired physically affects connections between the Zinc and Magnesium. “	effet, vous devez trouver comment, avec quelle force cela interagit avec le magnésium (Mg), [...] si cela vous fatigue physiquement, cela affecte les connexions entre le Zinc et le Magnésium.”
When you have done your research and understand the interactions on the plasmatic field strength level, then you do not use those elements that you know it will have unwanted effects on you. This preparation step brings with it the understanding of the totality of this new science.	Lorsque vous avez fait vos recherches et que vous comprenez les interactions au niveau de la force du champ plasmatique, vous n'utilisez pas les éléments dont vous savez qu'ils auront des effets indésirables sur vous. Cette étape de préparation permet de comprendre la totalité de cette nouvelle science.
Know what you want to use the elements for and understand what effect to expect from it because it might just not give you the effect you are looking for. “You might have understood the need of it for that place not to be but you’re forcing it to place it. “	Sachez à quoi vous voulez utiliser les éléments et comprenez l’effet que vous pouvez en attendre, car cela pourrait ne pas vous donner l'effet que vous recherchez. “Vous avez peut-être compris la nécessité d’utiliser tel élément dans tel but, mais vous obligez cet élément à atteindre ce but.”
Listen, research, and understand! INVITATION TO THE KESHE FOUNDATION

The Keshe Foundation is a scientific organization developing revolutionary technologies for space travel, health, energy, food, agriculture, animals, fauna and flora, forestry, environment, decontamination, and disaster recovery. This new Plasma Science and Technology is currently under development in many countries across our planet to provide affordable and simple solutions to many local problems. Many have seen beneficial results from the application of the Plasma Science and Technology developed by the Keshe Foundation and you are encouraged to learn more about it.

If you would like to learn about the new Plasma Science based solutions to many problems or difficulties you may have in the above-mentioned areas, you are invited to visit the following website links:

- Main link: <https://keshefoundation.org>
- What is the new Plasma Science? <https://kfsc.org>
- Keshe Foundation certified products: <https://keshefoundation.org/certs>
- Keshe Foundation Testimonials: <https://testimonials.keshefoundation.org>

INVITATION DE LA KESHE FOUNDATION

La Keshe Foundation est une entité scientifique concevant des technologies novatrices pour les voyages dans l'espace, la santé, l'énergie, l'alimentation, l'agriculture, les animaux, la faune et la flore, la sylviculture, l'environnement, la décontamination/réhabilitation en cas de catastrophe. Cette nouvelle science est en cours de développement dans maints pays de la planète pour apporter des solutions simples et abordables à plusieurs problèmes mondiaux. Beaucoup ont vu les bienfaits de la Plasma Science and Technology de la Keshe Foundation. Vous êtes encouragés à approfondir ce sujet.

Si vous souhaitez en savoir plus sur les nouvelles solutions de la Plasma Science pour résoudre de nombreux problèmes ou difficultés vous touchant dans les domaines mentionnés ci-dessus, vous êtes invités à consulter les liens suivants :

 <p>When looking at the structure of the spinal cord, we understand how the energy flows. This can be applied to animals, trees, plants, marine creatures. The spiral cord of a human is the central column field. We can see one half of it as the physically which is on the front side. Your soul has put dimension physically of the brain and you created the body head to face. But what about the back side of the human body? Why did we decide to have a flat back and different shape in the front? When we talk about forces and energy in the universe we must look at the spiral cord and the dimension of it. In reality a coil the field does not run on one side, but circularly all around it. If you look at the brain and the spine, when the fields are directed it creates the face the breast, the organs, the abdomen, the legs. However, the fields are circular, although the back is flat, the energy flows beyond it. (Figure 1) One side goes - one side goes. "If you want to understand it ask your lover to hold you and cuddle you from the back and see what fields you absorb about yourself. On the same is reverse hold your lover from the back in essence of understanding the field and then you see what you feel. Then you understand what man has been missing. You have to accept the status of love which means giving. How much I give what is received? You think they think differently. They can tell you they love you and you feel the love. We accept who holds us. We have no eyes behind our back, we do not trust anyone to reach us from the back, we guess if someone walks behind our back, but we allow our lover to hold us in the back. To cuddle us. It is very strange if you want to know the lie you hold your lover and ask the question you receive because what you hold in the front is your hands and what you feel through your hand is a totally different thing, is wrong. You know you have been told a lie. It is the best detector of the energy of the man in the direction of the physically not the soul of the man. You complete another circle which does not exist when you hold somebody. "You can imagine souls. I used to do that with my children. I hold them and say to my son and I said listen to what I tell you and I can tell you through my ear which is my soul to your soul, head to head, ear to ear you feel them, you understand them. You complete the two souls in one to each other. You put your head and your child's head with the ears next to each other, you have his soul there. It is the most beautiful experience if you are a parent. You do not need to say a thing, you feel it, you know it."</p> <p>Figure 1 Fields are circular, although the back is flat the energy flows beyond it</p>	 <p>When looking at the structure of the spinal cord, we understand how the energy flows. <p>A simple hug: the lie detector By Keshe Foundation 242nd Knowledge Seekers Workshop - September 20th, 2018 https://youtu.be/hv9WijInqdMU?t=8708</p>	<p>Une simple étreinte : le détecteur de mensonge Par la Keshe Foundation 242^{ème} Knowledge Seekers Workshop – 20 Septembre 2018 https://youtu.be/hv9WijInqdMU?t=8708</p>

<p>When looking at the structure of the spinal cord, we understand how the energy flows. This can be applied to animals, trees, plants, marine creatures.</p> <p>The spinal cord of a human is the central column field. We can see one half of it as the physicality which is us on the front side. Your soul has put dimension physicality of the brain and you created the body head to toe. But what about the back side of the human body? Why did we decide to have a flat back and different shape in the front?</p>	<p>En observant la structure de la moelle épinière, nous comprenons comment l'énergie circule. Cela peut s'appliquer aux animaux, aux arbres, aux plantes et aux créatures marines.</p> <p>Elle est le champ central de la colonne. Nous pouvons en voir une moitié comme la physicalité qui est nous, sur la face avant. Votre âme a créé la physicalité dimensionnelle du cerveau et vous avez créé le corps entier. Mais qu'en est-il de la partie arrière du corps ? Pourquoi avons-nous décidé d'avoir un dos plat et une forme différente à l'avant ?</p>
<p>When we talk about forces and energy in the universe we must look at the spinal cord and the dimension of it. In making a coil the field does not run on one side, but circularly all around it. If you look at the brain and the spine, when the fields are directed it creates the face, the breast, the organs, the abdomen, the legs. However, the fields are circular, although the back is flat, the energy flows beyond it. (Figure 1) One side gains - one side gives.</p>	<p>Lorsque nous parlons des forces et de l'énergie dans l'univers, nous devons considérer la moelle épinière et sa dimension. Pour une bobine, le champ ne s'étend pas d'un côté, mais de façon circulaire tout autour. Pour le cerveau et la colonne vertébrale, les champs sont dirigés. Cela crée le visage, la poitrine, les organes, l'abdomen et les jambes. Cependant, les champs sont circulaires. Bien que le dos soit plat, l'énergie circule au-delà de celui-ci. (Figure 1) Un côté gagne - un côté donne.</p>
<p>"If you want to understand it ask your lover to hold you and cuddle you from the back and see what fields you absorb about yourself. Do the same in reverse hold your lover from the back in essence of understanding the field and then you see what you feel. Then you understand what man has been missing. You have to accept the status of love which means giving. How much I give, what is received? You think they think what you think, and you can think what they think. They can lie to you with their lips, but when you hold them in the back you see right through them; because your field you absorb differently. They can tell you they love you and you feel the love. We accept who holds us. We have no eyes behind our back, we do not trust anyone to reach us from the back, we panic if someone walks behind our back, but we allow our lover to hold us in the back, to cuddle us. It is very strange if you want to know the lie you hold your lover and ask the question you receive because what you hold in the front in your hands and what you feel through your heart is a totally different thing, is wrong. You know you have been told a lie."</p>	<p>"Pour le comprendre, demandez à votre partenaire de vous étreindre et de vous câliner par derrière. Voyez quels champs vous absorbez de vous-même. Inversez les rôles : tenez votre partenaire par l'arrière pour comprendre le champ. Voyez ce que vous ressentez. Vous comprendrez alors ce qui manque à l'homme. Vous devez accepter l'amour qui signifie donner. Combien je donne, qu'est-ce qui est reçu ? Vous pensez qu'il pense ce que vous pensez et vous pouvez penser ce qu'il pense. Il peut vous mentir, mais en l'étreignant dans le dos, vous voyez en lui ; vous absorbez votre champ différemment. Nous acceptons qui nous tient. Nous n'avons pas d'yeux dans le dos, nous ne faisons confiance à personne qui nous atteigne par derrière, nous paniquons si quelqu'un marche derrière nous, mais nous permettons à notre partenaire de nous tenir dans le dos pour nous câliner. Dans le cas du mensonge, vous vous tenez en face de votre partenaire et lui posez la question que vous recevez. Être en face et ce que vous ressentez dans votre cœur est totalement différent, qui est faux. Vous saurez qu'on vous a menti."</p>

It is the best detector of the energy of the man in the direction of the physicality not the soul of the man. You complete another circle which does not exist when you hold somebody. "You can inspire souls, I used to do that with my children, I hold their ear next to my ear and I said listen to what I tell you and I can tell you through my ear which is my soul to your soul, head to head, ear to ear you feel them, you understand them. You complete the twin souls in one to each other. You put your head and your child's head with the ears next to each other, you have his soul there. It is the most beautiful experience if you are a parent. You do not need to say a thing, you feel it, you know it."

C'est le meilleur détecteur de l'énergie de l'homme dans la physicalité et non de l'âme de l'homme. Vous complétez un autre cercle qui n'existe pas quand vous tenez quelqu'un. "Vous pouvez inspirer les âmes. Je l'ai fait avec mes enfants. Je tenais leur oreille à côté de la mienne et je leur disais d'écouter ce que je disais. Par nos oreilles, je pouvais communiquer d'âme à âme, de tête à tête. Ils le sentaient, ils le comprenaient. Vous complétez les âmes jumelles. Vous mettez votre tête et la tête de votre enfant avec les oreilles l'une à côté de l'autre, vous avez son âme là. C'est la plus belle expérience qui soit pour un parent. Vous n'avez rien à dire, vous le sentez, vous le savez."

strength that can be measured in Tesla.

The Keshe Plasma Science and Technology is studying and applying the natural field forces of magnetic and gravitational strengths.

There is a measuring system for the magnetic field strength that applies to the strength of the human brain interactions internally. It applies to the fields from the Sun to the Earth. It applies to everything in this Universe or in the Universe which outputs the values in Tesla.

The Tesla (marked with the symbol "T") is a derived unit of the magnetic field strength in the International System of Units. The unit was set up during the General Conference on Weights and Measures in 1960 and named in the honor of Nikola Tesla.

But together with the Magnetic field strength, we have the

Journal of Tesla, researched by Prof. Dr. Ing. Konstantin Meyl and this is the gravitational field. One cannot exist without the other.

We can measure even the strength of our soul in Tesla. If one goes to the depth of understanding to know that there is a magnetic field radius from the soul of the man at a given strength that in respect to the environment where the soul has manifested itself, in his interaction with this environment, one creates the transition of position - the brain of the man. In that process, Man develops his own field that in interaction with the physically matter condition of the position it creates the physicality of the body of the man.

Our souls have a Tesla strength. Even the wave at a given strength, which becomes emotion, laughter, joy has a

Plasma 101 : Les 129 Teslas Expliqués Par la Keshe Foundation

La Keshe Plasma Science and Technology étudie et applique les effets de champ naturel des forces magnétiques et gravitationnelles.

<p>There is a measuring system for the magnetic field strength that applies to the strength of the human brain interactions internally, it applies to the fields from the Sun to the Earth, it applies to everything in this Universe or in the Unicos which outputs the values in Tesla.</p>	<p>Il existe un système de mesure de l'intensité du champ magnétique qui s'applique à la force des interactions internes du cerveau humain, aux champs allant du Soleil à la Terre et à tout ce qui se trouve dans cet Univers ou dans l'Unicos et qui fournit les valeurs en Tesla.</p>
<p>The Tesla (marked with the symbol "T") is a derived unit of the magnetic field strength in the International System of Units. The unit was set up during the General Conference on Weights and Measures in 1960 and named in the honor of Nikola Tesla.</p>	<p>Le Tesla (marqué par le symbole "T") est une unité dérivée de l'intensité du champ magnétique dans le Système international d'unités. L'unité a été créée lors de la Conférence générale des poids et mesures en 1960 et nommée en l'honneur de Nikola Tesla.</p>
<p>But together with the Magnetic field strength, we have the reversal of Tesla, researched by Prof. Dr. Ing. Konstantin Meyl and this is the gravitational field. One cannot exist without the other.</p>	<p>Avec l'existence du champ magnétique vient celle du champ gravitationnel. L'un ne peut exister sans l'autre. C'est la réversibilité de Tesla. Il est étudié par le Professeur Dr. Konstantin Meyl.</p>
<p>We can measure even the strength of our soul in Tesla. If one goes to the depth of understanding to know that there is a magnetic field radius from the soul of the man at a given strength that in respect to the environment where the soul has manifested itself, in his interaction with this environment, one creates the transition of position – the brain of the man. In that process, Man develops his own fields that in interaction with the physicality matter condition of the position it creates the physicality of the body of the man.</p>	<p>Nous pouvons même mesurer la force de notre âme en Tesla. Si une personne va profondément dans la compréhension, elle saura qu'il existe un champ magnétique avec une certaine force qui part de l'âme de l'homme. Et que, par rapport à l'environnement où l'âme s'est manifestée, dans son interaction avec cet environnement, on crée la transition de position - le cerveau de l'homme. Dans ce processus, l'homme développe ses propres champs qui, en interaction avec la condition matérielle de la position, créent la physicalité du corps de l'homme.</p>
<p>Our souls have a Tesla strength. Even the wave at a given strength which becomes emotion, laughter, joy has a strength that can be measured in Tesla.</p>	<p>Nos âmes ont une intensité en Tesla. Même la vibration à une force donnée qui devient émotion, rire, joie, a une force qui peut être mesurée en Tesla.</p>
<p>The soul of the man is a fraction of the soul of the planet in Tesla strength, the soul of this planet in respect to the solar system or the Sun and the Sun in respect to the galaxy and the galaxy in respect to the central line of the universe all have their own strengths in Tesla.</p>	<p>L'âme de l'homme, mesurable en Tesla, est une fraction de l'âme de la planète. L'âme de cette planète par rapport au système solaire ou le Soleil et le Soleil par rapport à la galaxie et la galaxie par rapport à la ligne centrale de l'univers ont tous leurs propres intensités en Tesla.</p>
<p>Through the project funded by the 100 Tesla Multi-Shot Program, a joint initiative of the National Science Foundation and the Department of Energy's Office of Basic Energy Sciences, the scientists in Los Alamos have created in a three-second span on Friday, August 19th, 2011 a 97.4 Tesla magnetic field — the highest non-destructive magnetic field in the world.</p>	<p>Par le programme 100 Tesla Multi-Shot, initiative conjointe de la National Science Foundation et du Department of Energy's Office of Basic Energy Sciences, les scientifiques de Los Alamos ont créé pendant trois secondes, le 19 août 2011, un champ magnétique de 97,4 Teslas - le champ magnétique non destructif le plus élevé au monde.</p>

When we are in the material state we have complexity. At the time the matter is opened to reach the plasma the way Keshe Foundation researchers did in Desenzano on October 2014, 129 Tesla is nothing.

Page 13 KF NEWS

Foundation researchers did in Desenzano on October 2014, 129 Tesla is nothing.

The 129 Tesla was not achieved over a flip of a finger. It was a live presentation over 3-4 weeks during which it was jumping around 20 - 21 Tesla, then it passed 25 Tesla, then it passed 100 Tesla and it built it up to 129 Tesla.

magnetic field shields which means everything was at the weakest. It absorbed most of it. System 1 is feeding System 3 via System 2, and System 3 is returning to System 1 via System 2, creating an infinite loop plasma field flow. The more System 1 fed, the less System 3 was returning back to it. System 1 was feeding more because System 3, having the blanket with

were running these tests, this (on the ceiling) is part of the, it's in the building and we had fluorescent lights and at night we used to stand and watch because there were so many fields that the fields of the plasma used to bring the lights on, used to, you know you go to the North Pole to see Aurora we had our own show every night... in the lab.

We used to switch up and wait for it because it cannot come on if there was no field, and after a while when the fields, we switched everything else and the field was there and it... it does off.

We stand there a few minutes and then that's it, we used to go, it was what we called late night sky show. This is the same principle as Tesla, we know when it shows the fluorescent light in the magnetic field, now we had it, it was beautiful to see it every night before we switch off and if one day it wouldn't do we'd say "we didn't do good enough, we didn't create enough plasma."

The power of plasma was discovered through the new materials - GANDS. When replacing the GANDS with the neutron plasma anyone can achieve 129 in the light systems.

How was the setup done to achieve such results?

System 1 was placed on one side. System 2 was in the middle and the System 3 was covered in

"It was very interesting when we

Les 129 Teslas n'ont pas été obtenus par un simple claquement de doigts. Il s'agissait d'une présentation en direct par étape sur 3 à 4 semaines, débutant autour des 20 - 21 Teslas puis 25 Teslas, puis 100 Teslas pour finir à 129 Teslas.

Les mesures ont été effectuées à l'aide de capteurs spécialement conçus. Ils ont ensuite été envoyés dans des laboratoires en Suisse pour test par les fabricants. Un rapport est revenu montrant que les capteurs étaient en parfait état et que les mesures à 129 Teslas étaient correctes.

Quel était le setup d'un tel résultat ?

Le système 1 a été placé sur un côté. Le système 2 était au milieu et le système 3 était couvert

another side of the research laboratory. All three systems have star formation configurations.	d'un autre côté du laboratoire de recherche. Les trois systèmes étaient des star formations.
System 3 The	
The plasma from the GANS materials created a field. System 3 was covered by the balanced magnetic field shields which means everything was at the weakest, it absorbed most of it. System 1 is feeding System 3 via System 2, and System 3 is returning to System 1 via System 2, creating an infinite loop plasma field flow. The more System 1 fed, the less System 3 was returning back to it. System 1 was feeding more because System 3, having the blanket with the plasma heartbeat inside was absorbing almost everything, dissipating very little out. This was awareness of existence because the internal field could detect the magnetical of System 3 according to the gravitation of System 1.	Le plasma du GANS a créé un champ. Le système 3 était couvert par les boucliers de champ magnétique équilibré, ce qui signifie que tout était au plus faible, il en absorbait la plus grande partie. Le système 1 alimentait le système 3 via le système 2, et le système 3 renvoyait au système 1 via le système 2, créant un flux de champ de plasma en boucle infinie. Plus le système 1 alimentait, moins le système 3 renvoyait. Le système 1 alimentait plus parce que le système 3, dissipant très peu à l'extérieur étant sous le bouclier des battements de cœur du plasma, absorbait presque tout. C'était la conscience de l'existence car le champ interne pouvait détecter le champ magnétique du système 3 en fonction de la gravitation du système 1.
System 1 to System 3 was Tesla; System 3 to System 1 was Meyl. The detecting sensors were placed on one side and the other of System 2 to observe the motion of the field. The entire setup used only 4 motors, on a total consumption of 12 Watt just to rotate the star formations and a plasma emission was created as it was needed. System 2 and 3 had partially components from the Iranian reactors and each one had reactors inside.	Les systèmes 1 à 3 étaient Tesla ; les systèmes 3 à 1 étaient Meyl. Les capteurs étaient placés de chaque côté du système 2 pour observer le mouvement du champ. Le setup utilisait 4 moteurs (consommation totale de 12 watts), pour faire tourner les star formations. Du plasma était créée selon les besoins. Les systèmes 2 et 3 étaient partiellement constitués de composants provenant des réacteurs iraniens et chacun d'eux comportait des réacteurs à l'intérieur.
"It was very interesting when we were running these tests... this (on the ceiling) is part of the... it's in the building and we had fluorescent lights and at nights we used to stand and watch because there were so many fields that the fields of the plasma used to bring the lights on, used to... you know you go to the North Pole to see Aurora we had our own show every night... in the lab.	"Ces tests ont été très intéressants ... ceci (au plafond) fait partie du ... c'est dans le bâtiment et nous avions des lampes fluorescentes. La nuit, nous restions debout à regarder parce qu'il y avait tellement de champs que les champs de plasma en arrivaient à allumer les lumières ... vous savez vous allez au pôle Nord pour voir les aurores ; nous avions notre propre spectacle chaque soir ... dans le laboratoire.
We used to switch up and wait for it because it cannot come on if there was no field, and after a	Nous allumions et attendions qu'il s'allume parce qu'il ne peut que s'il y a des champs, et après un

while when the fields... we switched everything else and the field was there and is... it dies off.	certain temps, quand les champs ... nous allumions tout et le champ était là et ... il meurt.
We stand there a few minutes and then that's it, we used to go. It was what we called late night sky show. This is the same principle as Tesla, we know when it shows the fluorescent light in the magnetic field, now we had it... it was beautiful to see it every night before we switch off and if one day it wouldn't do we'd say '...we didn't do good enough, we didn't create enough plasma.' ”	Nous restions quelques minutes et nous partions. On appelait ça le spectacle du ciel de fin de nuit. Le même principe que Tesla, quand la lumière fluorescente s'allumait par le champ magnétique, nous l'avions ... c'était beau à voir chaque nuit avant d'éteindre. Si un jour ça ne marchait pas, nous disions : "nous n'avons pas fait assez bien, nous n'avons pas créé assez de plasma.”
The power of plasma was discovered through the new materials – GANS. When replacing the GANS with the neutron plasma anyone can achieve lift in the flight systems.	La puissance du plasma a été découverte grâce aux nouveaux matériaux - GANS. Remplacer les GANS par du plasma neutronique et vous obtenez une portance pour les systèmes de vol.

The Soul Focus Group By Marie	The Soul Focus Group Par Marie
The Soul Focus Group is an initiative from the educational board in the KF SSI Education where	Le Soul Focus Group (groupe de concertation de l'Âme) est une initiative du conseil éducatif de la

the students were asked to participate in the teaching and spreading of knowledge, early in the 1st semester of 2018.	KF SSI Education où les étudiants étaient invités à participer à l'enseignement et à la diffusion des connaissances, au début du 1er semestre 2018.
It was planned as a workshop with contributions from students where we looked into the public Soul teachings by Mr. Keshe. Since my wish was to contribute more to the foundation I volunteered as a presenter for the Soul Focus Group. I was already doing a lot of self-studying and the Soul topic was close to my heart.	C'était un atelier avec des contributions d'étudiants où nous avons examiné les Public Soul Teachings de Mr Keshe. Je souhaitais contribuer davantage à la Keshe Foundation. J'étais donc volontaire pour animer ce groupe de discussion. J'étais déjà très autodidacte et le sujet de l'âme me tenait à cœur.
Since then the Soul Focus group has been a weekly event and the interest for the group has been growing.	Depuis lors, le Soul Focus Group est un événement hebdomadaire et l'intérêt pour le groupe ne cesse de croître.
How we do it	Comment ça se passe ?
The Soul Focus Group is based on a list of short videos from Mr. Keshe's public workshops. In many of the public workshops, there is a distinct part where there are not many questions from the audience. This is what the Soul teaching list is based on. The teaching is then divided into smaller parts depending on the content.	Le Soul Focus Group est basé sur des courtes vidéos des ateliers publics de Mr Keshe. Dans beaucoup de ces ateliers, il y a une partie où il n'y a pas beaucoup de questions du public. C'est sur cela que se base la Soul Teachings List. L'enseignement est ensuite divisé en petites parties en fonction du contenu.
The Soul teaching list contains a direct link to the Public Knowledge Seekers Workshops with Mr. Keshe on YouTube. Since all videos are transcribed by the Keshe Foundation transcribers team it is easy to find the transcript and distribute it in advance to the students. This is our study material together with the Soul teaching list.	La Soul Teachings List contient un lien direct vers les Public Knowledge Seekers Workshops avec Mr Keshe sur YouTube. Comme toutes les vidéos sont transcrites par l'équipe de transpositeurs de la Keshe Foundation, il est facile de trouver la transcription et de la distribuer à l'avance aux étudiants. Voici notre matériel d'étude ainsi que la Soul Teachings List.
During our weekly session, we play these videos one by one, with subtitles and transcriptions turned on. And after a short summary, all students are invited to participate in the discussion about the teachings and what we as individuals have gained from what we heard.	Pendant notre session hebdomadaire, nous passons ces vidéos une par une, avec sous-titres et transcriptions activés. Après un bref résumé, tous les étudiants sont invités à discuter des enseignements et sur ce que nous avons retiré, en tant qu'individus.
What the soul teachings have brought to the community	Ce que les Soul Teachings ont apporté à la communauté :
The Soul Focus group is a good place for any student to study the knowledge about the Soul. By listening to the unaltered words of Mr. Keshe, everyone can take from the teachings what they like. It is an arena for sharing of knowledge and a place to ask questions and share thoughts that otherwise can be hard to bring to light in public classes.	Le Soul Focus Group est un bon endroit pour ceux qui souhaitent étudier les connaissances sur l'âme. Par les mots inaltérés de Mr Keshe, chacun peut tirer des enseignements ce qu'il veut. C'est un lieu de partage des connaissances, pour poser des questions et partager des réflexions qui, autrement, peuvent être difficiles à mettre en lumière dans les cours publics.

<p>We are all students on different levels of understanding and we are helping each other out in our comprehension of the knowledge. The group is also a nice place to get to know the other students better.</p>	<p>Nous sommes tous des étudiants à différents niveaux de compréhension et nous nous aidons mutuellement dans notre compréhension des connaissances. Le groupe est également un endroit agréable pour faire connaissance.</p>
<p>The List of Soul Teachings gives anyone a structured way to work through the soul teachings from Mr. Keshe. Even if your day is packed, you always have time for 10 minutes of self-study. And you can listen to this 10 minutes over and over again because these teachings contain layers on layers of knowledge. You will hear something new every time. And the teachings are in sequence, that means a video played often refers to previous videos in the list.</p>	<p>La Soul Teachings List est une façon structurée de travailler par les enseignements de l'âme de Mr Keshe. Même avec une journée pleine, vous avez toujours le temps pour 10 minutes d'auto-formation. Et vous pouvez les écouter en boucle car ces enseignements contiennent des couches de connaissances successives. Vous entendrez quelque chose de nouveau à chaque fois. Et les enseignements sont dans l'ordre, une vidéo se réfère souvent à des vidéos précédentes de la liste.</p>
<p>Conclusion</p> <p>The Soul Focus group provides teachings about the Soul easily available for any student at the KF SSI Education. The students can take from it what they need and according to their intelligence (as Mr. Keshe often says). It is a tool to deep dive into the teachings about the Soul and they can be listened to over and over again for deeper understanding.</p> <p>As Mr. Keshe says: When we read or hear something, that is all we do. When it is understood it is sharing the Soul with the person who gave you the knowledge. That is how you elevate yourself.</p> <p>So from my perspective, the Soul Focus Group is helping us elevate our own Soul by comprehending the knowledge and by sharing our understanding with the other students.</p> <p>The Soul Focus Group is scheduled every Monday at 17 CET on Zoom. If you want to participate become a KF SSI Education student and join in.</p> <p>You are so welcome!</p>	<p>Conclusion :</p> <p>Le Soul Focus Group fournit des enseignements sur l'âme facilement accessibles à tout étudiant de la KF SSI Education. Ils peuvent y puiser ce dont ils ont besoin et en fonction de leur intelligence (comme le dit souvent Mr Keshe). C'est un outil pour plonger dans les Soul Teachings et pour les écouter encore et encore pour une compréhension plus approfondie.</p> <p>Comme le dit Mr Keshe : Lorsque nous lisons ou entendons quelque chose, c'est tout ce que nous faisons. Quand on le comprend, c'est partager l'Âme avec la personne qui vous a donné la connaissance. C'est ainsi que vous vous élevez.</p> <p>Donc, de mon point de vue, le Soul Focus Group nous aide à élever notre propre Âme en comprenant les connaissances et en partageant notre compréhension avec les autres étudiants.</p> <p>Le Soul Focus Group : tous les lundis à 17h CET sur Zoom. Si vous souhaitez y participer, devenez étudiant du KF SSI Education et rejoignez-nous.</p> <p>Vous êtes les bienvenus !</p>

Achieve peace through testimonials by Keshe Foundation

This article brings forward the messages that Mr. Keshe delivered through 245th and 246th Public Teaching.

Achieve peace through testimonials. Interact through testimonials and scientific trials. Ask yourself: "Do I do enough each day to change the humanity?" How many of you are really committed to doing it?

A lot of you are even afraid to tell anyone you know about the Keshe Foundation because they have tinted us with so much that they think they won. The only thing is, we are strong enough and we have the knowledge which can bring the change. What may be lacking is being proud of this process.

We have gone through a very heavy battle but the battle is over because they used all the ammunition. They have nothing else to fire. The

Page 15 KF SSI ÉDUCATION

Instaurer la paix à travers les témoignages Par la Keshe Foundation

Cet article reprend les messages que Mr Keshe a délivrés dans les 245^{ème} et 246^{ème} Public Teachings.

Instaurer la paix par les témoignages. Interagir par des témoignages et des essais scientifiques. Demandez-vous : "Est-ce que j'en fais assez chaque jour pour changer l'humanité ?" Combien d'entre vous sont vraiment déterminés à le faire ?

Beaucoup d'entre vous ont peur de parler de la Keshe Foundation à quelqu'un parce qu'ils nous ont tellement dénigrés qu'ils pensent avoir gagné. La seule chose est que nous sommes assez forts et que nous avons les connaissances qui peuvent apporter le changement. Ce qui peut manquer, c'est d'être fier de ce processus.

Nous avons traversé une très lourde bataille, mais la bataille est terminée car ils ont utilisé toutes leurs munitions. Ils n'ont rien d'autre à

way we will handle it from now on, in interacting with governments, with politicians, with diplomats, with the economic situation, with people in need, will change the course of humanity.	tirer. La façon dont nous allons désormais gérer la situation, en interagissant avec les gouvernements, les politiciens, les diplomates, la situation économique, les personnes dans le besoin, va changer le cours de l'humanité.
Knowledge gives that chance for peace. We had to prove the technology. We had to prove the strength of the technology that with it we could attract and interact with nations. We reached that point. Now is the time of interaction. Do not only teach the technology. Show the beauty of technology by spending your time sending different cases, which are available in testimonials and scientific trials, across the internet to every person, every minister, every chatroom that you have access to. Do this every day, 20 minutes per day.	La connaissance donne cette chance pour la paix. Nous devons prouver la technologie. Nous devons prouver sa force pour attirer et interagir avec les nations. Nous y sommes. C'est maintenant le moment de l'interaction. Ne vous contentez pas d'enseigner la technologie. Montrez sa beauté en consacrant du temps à envoyer différents cas, qui sont disponibles dans des témoignages et des essais scientifiques, sur l'Internet à chaque personne, chaque ministre, chaque salon de discussion auquel vous avez accès. Faites-le 20 minutes tous les jours.
Mankind will take this technology through a strength of its health application because we are all fearful of pain, death, blindness and everything else. The fear of demise can be taken away by presenting the beauty of this technology.	L'humanité découvrira cette technologie par les applications de santé car nous avons tous peur de la douleur, de la mort, de la cécité et de tout le reste. La peur de la chute peut être éliminée en présentant la beauté de cette technologie.
We do not die. We just arrive at the airport where we have to change the environment. We call it transmutation of elements, in a way, is the transmutation of the soul of the man to change the physicality of this dimension to another. Another manifestation. When you change silver to gold, you have not lost anything. You just have a new dimension. Like the soul of the man elevates to the value of the gold.	Nous ne mourons pas. Nous arrivons juste à l'aéroport pour prendre un autre embarcadère. Nous l'appelons la transmutation des éléments, transmutation de l'âme de l'homme pour une physicalité d'une dimension qui se manifeste autrement. Quand vous changez l'argent en or, vous n'avez rien perdu. Vous avez juste une nouvelle dimension. Comme l'âme de l'homme qui s'élève à la valeur de l'or.
This transition, the beauty of it, how the man handles his physical life with the new knowledge to reach that point of transition with less pain, is what man always has feared - illnesses - and if we can show to humanity that this transition can be beautiful without pain and it can be short or at least can be shorted, every man will take the trip of life.	Cette transition, sa beauté, la façon dont l'homme gère sa vie physique avec ces nouvelles connaissances pour atteindre ce point de transition avec moins de douleur, est ce que l'homme a toujours craint - les maladies. Si nous pouvons montrer que cette transition peut être belle, sans douleur, courte ou être écourtée, chaque homme fera le voyage de la vie.
This is the job of Universal Council, Earth Council and every person who listens to these teachings. It is a wakeup call. Can I give enough that I can take back enough? No president has ever lived over his term and no king has been a king for centuries. They all die and they or their families all have diseases. Now is time to show that there is a chance. It does not cost much. We are not	C'est le travail du Conseil universel, du Conseil de la Terre et des personnes qui écoutent ces enseignements. C'est un appel à l'éveil. Puis-je en donner assez pour en reprendre assez ? Aucun président n'a vécu plus que son mandat. Aucun roi ne l'a été pendant des siècles. Ils meurent et eux ou leurs familles ont des maladies. Il est temps de montrer cette chance qui ne coûte pas

selling it. We are gifting it. It is time for peace and peace has to come through the knowledge. We will stop the weapons when we understand that the only weapon in not stopping these wars is us in not sharing the knowledge and the beauty of it.	cher. Nous ne la vendons pas. Nous la donnons. Il est l'heure de la paix qui viendra de la connaissance. Nous arrêterons les armes quand nous comprendrons que la seule arme pour ne pas arrêter ces guerres est de ne pas partager le savoir et sa beauté.
It is time to spend 20 minutes of your time per day sending testimonials and scientific cases published by Keshe Foundation across the Internet if you are here to volunteer for peace. Besides health, the key to support the governments is also agriculture. Scientific cases help national food security with better harvest and quality of it. Soon we will publish many new discoveries. Send them across. Every day.	Si vous êtes volontaire pour la paix, consacrez 20 mins par jour à l'envoi de témoignages et de cas scientifiques publiés par la Keshe Foundation sur l'Internet. Outre la santé, la clé pour soutenir les gouvernements est aussi l'agriculture. Les cas aident à la sécurité alimentaire (meilleure récolte et meilleure qualité). Nous publierons bientôt plusieurs nouvelles découvertes. Envoyez-les nous. Chaque jour.
The question every knowledge-seeker should ask him/herself each day: "Do I do enough each day to change the course of humanity and bring the peace?" How many of us have spent 20 minutes each day or at least once per week sending the information about Keshe Foundation across the internet? How many are committed to doing it? We want peace, we want everything else, we want a knowledge but we are not prepared to work for it. As long as it is for your benefit and you can see it.	Chaque jour, tout Knowledge Seeker devrait s'interroger : "Est-ce que je fais assez chaque jour pour changer le cours de l'humanité et apporter la paix ? Combien ont passé 20 minutes chaque jour ou au moins une fois par semaine à informer sur la Keshe Foundation via l'Internet ? Combien se sont engagés à le faire ? Nous voulons la paix, nous voulons tout le reste, nous voulons un savoir mais nous ne sommes pas prêts à travailler pour cela. Tant que c'est dans votre intérêt et que vous pouvez le voir.
Go outside at night and look at the planets and stars. You see many planets and stars. Lot of you know that Earth has a soul. So does the star. How many of you can see the soul of planets and stars? Stand in front of your partner, child or pet. Do you see or feel their soul?	La nuit, sortez regarder les planètes et les étoiles. Vous en voyez beaucoup. Beaucoup d'entre vous savent qu'elles ont une âme. Combien peuvent les voir ? Pareil pour votre partenaire, votre enfant ou votre animal de compagnie. Voyez-vous ou sentez-vous leur âme ?
We do not play magic. This is where we lost it. We lost the ability to see with the soul. Man will have a hard time in space if he tries to just look what he can see with his eyes because some of the souls have no physicality at the field strength of the man.	Nous ne jouons pas au magicien. Nous l'avons perdue, la capacité de voir avec l'âme. L'homme aura du mal dans l'espace s'il ne regarde que ce qu'il peut voir avec ses yeux, car certaines âmes n'ont pas de corps à la force du champ de l'homme.
Would we come up with soul vision like we have night vision glasses? We need to elevate. We have the tools. The souls when they commit themselves, they do it. When my soul decides, it becomes my wish. Send testimonials and every published scientific case or trial daily. Let everyone know about it.	Avons-nous la vision de l'âme tel des lunettes de vision nocturne ? Nous devons nous élever. Les outils pour ça sont là. Quand les âmes s'engagent, elles le font. Quand mon âme décide, cela devient mon souhait. Envoyez quotidiennement des témoignages et tous les cas scientifiques ou essais. Faites-le savoir à tout le monde.

PLASMA PRODUCTS

PLASMA SEAT PAD

CE Certified Class I Medical Device

Bring relief in your daily life and allow yourself to refocus on what is important: enjoying life at full, in perfect balance, with the PLASMA SEAT PAD.

Ergonomic Design
Easy to use
Adjustable
Lightweight
Portable
Durable
Suitable at home, in the car, at office
Perfect gift!

Page 16
LES PRODUITS PLASMA

PLASMA SEAT PAD

Matériel Médical de Classe 1 certifié CE

Apportez-vous du soulagement quotidien. Autorisez-vous l'essentiel : profiter pleinement de la vie en parfait équilibre avec le PLASMA SEAT PAD.

Design ergonomique
Utilisation aisée
Ajustable
Léger
Transportable
Solide
À la maison, dans la voiture, au bureau
Le cadeau parfait !

1 out of 5 people suffers from back pain. Are you one of them?

Increasingly, the back pain is one of the concerns of this century. In everyday life, the spine is under tremendous stress and pressure. It is therefore not surprising that lumbar pain, also known as back pain, is one of the main causes people suffer from. A recent study was done by American and Australian researchers on the subject. By analyzing the statistics of 187 countries, they found that about one-tenth (9.4%) of the world's population, were suffering from this condition. People with back pain for more than 3 months are considered to have chronic back pain. In most cases, the back pain is mechanical, however, for about 1 in 20 persons, the pain is of inflammatory origin. Affected people can wait up to 10 years or more before the cause of their sufferance is properly diagnosed.

Kashe Foundation Manufacturing had the idea to develop a new product to address this widespread problem. By combining the Kashe Plasma Science and Technology with the knowledge from specialists in the field of health, we are pleased to present you the PLASMA SEAT PAD.

The PLASMA SEAT PAD generates its own magnetic-gravitational plasma fields which are directed to the point of pain to relieve it. It has no moving parts or batteries, making it a lightweight, durable, portable, and versatile product. Using the carry-on bag provided in the package, you can take it anywhere! Due to its ergonomic design, the PLASMA SEAT PAD adapts to any type of chair or seat, for you to now enjoy very quickly the comfort and the pain relief. The PLASMA SEAT PAD can be used as a whole or it can be used per components that are easily attachable with velcro bands. The floss straps on the side help to secure the PLASMA SEAT PAD on your preferred seat.

Are you a mother standing in her feet all day, carrying all the heaving baggage for your baby, and knows the lower back pain? Are you an office clerk that spends all day in the same static posture on that office chair? Are you a driver spending hours and hours behind the steering wheel, on seats that do not support the natural curve of your back? Or you have lovely grandparents feeling the fingerprint of life left on their tired bodies.

If you suffer every day from that horrendous back pain, take a rest on the PLASMA SEAT PAD:

1 personne sur 5 souffre de mal de dos. Êtes-vous l'une d'entre elles ?

De + en +, le mal de dos est l'une des préoccupations de ce siècle. Quotidiennement, le dos subit un stress et une pression énormes. Il est donc normal que les douleurs lombaires, le mal de dos, soient l'une des principales causes dont souffrent les gens.

Une étude récente, réalisée par des chercheurs américains et australiens dans 187 pays, a montré qu'environ un 1/10^{ème} (9,4 %) de la population mondiale souffrait de cette maladie. Les personnes atteintes depuis plus de 3 mois sont considérées comme malades chroniques. Dans la plupart des cas, la douleur dorsale est mécanique. Mais, pour environ 1 personne sur 20, la douleur est d'origine inflammatoire. Les personnes touchées peuvent attendre jusqu'à 10 ans ou plus pour que leur souffrance soit correctement diagnostiquée.

<p>Keshe Foundation Manufacturing had the idea to develop a new product to address this widespread problem. By combining the Keshe Plasma Science and Technology with the knowledge from specialists in the field of health, we are pleased to present you the PLASMA SEAT PAD.</p>	<p>La Keshe Foundation Manufacturing a eu l'idée de développer un nouveau produit pour répondre à ce problème très répandu. En combinant la Keshe Plasma Science and Technology avec les connaissances de spécialistes dans ce domaine, nous sommes heureux de vous présenter le PLASMA SEAT PAD.</p>

Page 18 LANGUAGE COMMUNITY

RISING INTERESTS IN PLASMA SCIENCE CLASSES
AMONG KENYA'S GĪKŪYŪ RURAL COMMUNITIES SHOW THE NEED
FOR TEACHING IN NATIVE LANGUAGES ACROSS THE WORLD
 by Gatua wa Mbūgwa, Ph.D. (Gĭkŭyŭ Universal Council Member)

The increasingly rising number of participants in Plasma Science classes among the Gĭkŭyŭ rural communities of Kenya shows there is a need for sharing the new scientific knowledge in native languages not only in Kenya but globally as well.

Plasma Science classes were first offered in Kenya in 2016 with only a few people initially showing interest. Learning interests significantly began to rise when these classes were first conducted publicly among the Gĭkŭyŭ rural communities of central Kenya from January 2018.

These classes are offered at no cost to participants, except perhaps their transportation cost and related expenses.

Numbers of participants in Plasma Science classes for the Gĭkŭyŭ rural communities have increased over time from the initial 14 participants in the first session to reach over 300 that now attend each weekly session. A considerable number of participants also come from distant towns, cities, and other locations and include people who speak not only the Gĭkŭyŭ language but also other Kenyan native languages as well.

The renowned Iranian-born Nuclear Engineer who developed Kasha Plasma Science and Technology, Mahran Tavakoli Kasha, was first to discover the location of gravity. This discovery brought a completely new understanding of science and how matters are created in the universe.

INTÉRÊT CROISSANT POUR LES PLASMA SCIENCE CLASSES DANS LES COMMUNAUTÉS RURALES GĪKŪYŪ (KENYA) - NÉCESSITÉ D'ENSEIGNEMENT EN LANGUES NATIVES À TRAVERS LE MONDE
 par Gatua wa Mbūgwa, Ph.D. (Membre Gĭkŭyŭ de l'Universal Council)

Le nombre croissant de participants aux Plasma Science Classes dans les communautés rurales Gĭkŭyŭ (Kenya) montre le besoin de partager les nouvelles connaissances scientifiques dans les langues natifs au Kenya et dans le monde entier.

Le début des Plasma Science Classes au Kenya s'est fait en 2016. Seules quelques personnes se sont montrées intéressées. L'intérêt a significativement augmenté après la dispensation publique dans les communautés rurales Gĭkŭyŭ (centre du Kenya) depuis janvier 2018.

Ces cours sont offerts gratuitement aux

<p>participants, except perhaps their transportation cost and related expenses.</p>	<p>participants, à l'exception peut-être des frais de transport et des dépenses connexes.</p>
<p>Numbers of participants in Plasma Science classes for the Gĩkũyũ rural communities have increased over time from the initial 14 participants in the first session to reach over 300 that now attend each weekly session. A considerable number of participants also come from distant towns, cities, and other locations and include people who speak not only the Gĩkũyũ language but also other Kenyan native languages as well.</p>	<p>Le nombre de participants aux Plasma Science Classes pour les communautés rurales Gĩkũyũ a augmenté au fil du temps, des 14 participants de la 1^{ère} session à plus de 300 maintenant à chaque session hebdomadaire. Un nombre considérable de participants viennent également de villes, de cités et d'autres endroits éloignés, des personnes qui parlent non seulement le Gĩkũyũ, mais aussi d'autres langues indigènes kenyanes.</p>

This discovery brought a completely new understanding of science and how matters are created in the universe.</p>	<p>Le célèbre ingénieur nucléaire iranien Mehran Tavakoli Keshe a développé la Keshe Plasma Science and Technology. Il a été le premier à découvrir les origines de la gravité. Cette découverte a apporté de toutes nouvelles compréhensions notamment sur la création de la matière dans l'univers.</p>
<p>Page 19 LANGUAGE COMMUNITY</p>	<p>Page 19 LA COMMUNAUTÉ LINGUISTIQUE</p>
 <p>Mr. Keshe has published three books, The Universal Order of Creation of Matters, The Structure of the Light, and The Origins of the Universe, among other notable publications.</p> <p>All his published works form the basis for teaching and learning Plasma Science that is now widely taught globally. Plasma Science is not only transforming lives in Kenya but globally as well. Basically, a spaceship science, it is applied in agriculture, health, nanotechnology, the creation of materials, and information technology, among other scientific fields. By totally understanding how plants absorb carbon from the atmosphere, for example, Mr. Keshe designed technology that replicates a plant's leaf for the effective capture of CO₂ and other atmospheric gases in their nano state (GANS).</p> <p>A gas in Nano state, according to Mr. Keshe, is a new state of matter, where a gas molecule that becomes Nano of itself, appears as a solid state of matter (Keshe, MT, 2011: The Structure of the Light).</p> <p>It is especially this GANS capture technology and application and the positive impacts of the captured GANS on both agriculture and human health that has generated wide acceptance of Plasma Science learning among the Gĩkũyũ rural communities of Kenya. GANS and their liquid plasmas are used to enhance human health and agriculture production. Common conditions such as diabetes, high blood pressure, kidney failure, vision problems, viral and bacterial imbalances, septic wounds and various body pains and swellings have been successfully processed and health of those affected enhanced. In addition, field experiments have shown improved crop health and enhanced agricultural productivity.</p> <p>Of particular importance to the Gĩkũyũ rural communities Plasma Science class participants is that they are taught all the methods and steps needed for capturing various GANSes from the environment using hands-on methods that allow them to learn by doing.</p> <p>These methods include nanocoating process and the proper making of copper wire coils for effective GANS capture.</p> <p>five GANS capture. Class participants have therefore acquired practical knowledge of capturing and using various important GANSes and their amino acids.</p> <p>They have also learned about the power of their own souls as well as the Keshe Foundation Ethos: "We are here to serve, and not to be served."</p> <p>The Gĩkũyũ language has also benefited greatly as Plasma Science has brought new concepts and scientific words that are continually added to the language terminology. For example, the new Gĩkũyũ word for GANS (Gases in Nano Solid State) is MIMOMO (Mru) Mulilo Mubutu Mũmũgũ, while the new Gĩkũyũ term for Plasma Science is Ūtĩmũtĩ wa Gĩkũmũ.</p> <p>As the teacher of Plasma Science classes in Kenya, the author has learned that by freely sharing the acquired Plasma Science knowledge with participants, the teacher continually gains deeper insights the more he freely shares. This is consistent with Mr. Keshe's teaching: "The more we give, the more we receive."</p> <p>The teaching methods used in Kenya can easily be replicated anywhere in the world. These methods can also be improved and developed further to include distant participants. For example, with high-quality recording equipment, computers, and projectors, participants from any location in the world could join the classes through the internet, thus making such classes more available to the general public both at the time of teaching and thereafter.</p> <p>In sum, the simplicity in capturing and using GANS, the GANS effective impacts on both human health and enhanced agricultural productivity, learning in one's own language, and the sharing of Plasma Science knowledge freely without cost to participants have all contributed to the increased Plasma Science learning interests and rising number of class participants among Kenya's Gĩkũyũ rural communities.</p> <p>The following figures show increasing attendance and some of the Gĩkũyũ rural community participants' learning activities.</p> <p>These methods include nanocoating process and the proper making of copper wire coils for effective</p>	 <p>Mr. Keshe has published three books, The Universal Order of Creation of Matters, The Structure of the Light, and The Origins of the Universe, among other notable publications.</p> <p>All his published works form the basis for teaching and learning Plasma Science that is now widely taught globally. Structure of the Light, and The Origins of the Universe, among other notable publications.	Light et The Origins of the Universe, entre autres publications remarquables.
All his published works form the basis for teaching and learning Plasma Science that is now widely taught globally. Plasma Science is not only transforming lives in Kenya but globally as well. Basically, a spaceship science, it is applied in agriculture, health, Nanotechnology, the creation of materials, and information technology, among other scientific fields. By totally understanding how plants absorb carbon from the atmosphere, for example, Mr. Keshe designed technology that replicates a plant's leaf for the effective capture of CO ₂ and other atmospheric gases in their Nano states (GANS).	Ses travaux publiés constituent l'enseignement et l'apprentissage de la Plasma Science, maintenant largement enseignée dans le monde. La Plasma Science transforme des vies au Kenya, mais aussi dans le monde. Elle est essentiellement une science spatiale, appliquée à l'agriculture, à la santé, aux nanotechnologies, à la création de matériaux et aux technologies de l'information entre autres. En comprenant l'absorption du carbone par les plantes, Mr Keshe a conçu une technologie reproduisant la feuille pour capturer efficacement le CO ₂ et d'autres gaz de l'atmosphère dans leurs nano-états (GANS).
A gas in Nano state, according to Mr. Keshe, is a new state of matter, where a gas molecule that becomes Nano of itself, appears as a solid state of matter (Keshe, MT, 2011. The Structure of the Light).	Le GANS, selon Mr Keshe, est un nouvel état de la matière, où une molécule de gaz qui devient Nano d'elle-même, apparaît comme un état solide de la matière (Keshe, MT, 2011. The Structure of the Light).
It is especially this GANS capture technology and application and the positive impacts of the captured GANS on both agriculture and human health that has generated wide acceptance of Plasma Science learning among the Gĩkũyũ rural communities of Kenya. GANS and their liquid plasmas are used to enhance human health and agriculture production. Common conditions such as diabetes, high blood pressure, kidney failure, vision problems, viral and bacterial imbalances, septic wounds and various body pains and swellings have been successfully processed and health of those affected enhanced. In addition, field experiments have shown improved crop health and enhanced agricultural productivity.	C'est surtout cette technologie de capture et d'application des GANS et ses impacts positifs sur l'agriculture et la santé qui ont généré une large acceptation de l'apprentissage dans les communautés rurales Gĩkũyũ du Kenya. Les GANS et leurs Liquid Plasma sont utilisés pour améliorer la santé et l'agriculture. Des affections courantes (diabète, hypertension, insuffisance rénale, problèmes de vision, déséquilibres viraux et bactériens, plaies septiques, diverses douleurs et gonflements corporels) ont été traitées avec succès et amélioration de la santé des personnes. De plus, des expériences sur le terrain ont montré une amélioration de l'état des cultures et une augmentation de la productivité agricole.
Of particular importance to the Gĩkũyũ rural communities' Plasma Science class participants is that they are taught all the methods and steps needed for capturing various GANSes from the environment using hands-on methods that allow them to learn by doing.	Ce qui est très important pour les participants au cours de Plasma Science des communautés rurales Gĩkũyũ est l'enseignement des techniques et étapes pour capturer les différents GANS de l'environnement par des méthodes concrètes qui leur permettent d'apprendre par la pratique.
These methods include nanocoating process and the proper making of copper wire coils for effective GANS capture. Class participants have therefore acquired practical knowledge of capturing and using various important GANSes and their amino acids.	Processus de nano-revêtement et fabrication de bobines de fil de cuivre pour une capture efficace des GANS sont au programme. Les participants aux cours ont donc acquis des connaissances pratiques sur la capture et l'utilisation de divers GANS importants et de leurs acides aminés.

They have also learned about the power of their own souls as well as the Keshe Foundation Ethos: “We are here to serve, and not to be served.”	Ils ont également appris le pouvoir de leur âme ainsi que l'éthique de la Keshe Foundation : “Nous sommes ici pour servir, et non pour être servis.”
The Gĩkũyũ language has also benefitted greatly as Plasma Science has brought new concepts and scientific words that are continually added to the language terminologies. For example, the new Gĩkũyũ word for GANS (Gases in Nano Solid State) is MĩMũMũ (Mĩrukĩ Mĩtuĩku Mũtuutu Mũmingiri), while the new Gĩkũyũ term for Plasma Science is “Ũthimũri wa Gĩkama.”	Le langage Gĩkũyũ a également beaucoup profité de la Plasma Science. Elle a apporté de nouveaux concepts et des mots scientifiques qui sont continuellement ajoutés à ce langage. Par exemple, le nouveau mot Gĩkũyũ pour GANS est MĩMũMũ (Mĩrukĩ Mĩtuĩku Mũtuutu Mũmingiri), tandis que le nouveau terme Gĩkũyũ pour Plasma Science est “Ũthimũri wa Gĩkama.”
As the teacher of Plasma Science classes in Kenya, the author has learned that by freely sharing the acquired Plasma Science knowledge with participants, the teacher continually gains deeper insights the more he freely shares. This is consistent with Mr. Keshe’s teaching – “the more we give, the more we receive.”	En tant qu'enseignant, l'auteur a appris qu'en partageant librement avec les participants les connaissances de la Plasma Science, il acquerrait continuellement des connaissances plus approfondies par le partage. Ceci est conforme à l'enseignement de Mr Keshe : “plus on donne, plus on reçoit.”
The teaching methods used in Kenya can easily be replicated anywhere in the world. These methods can also be improved and developed further to include distant participants. For example, with high-quality recording equipment, computers, and projectors, participants from any location in the world could join the classes through the internet, thus making such classes more available to the general public both at the time of teaching and thereafter.	Les méthodes d'enseignement utilisées au Kenya peuvent facilement être reproduites partout ailleurs. Elles peuvent également être améliorées et développées pour inclure des participants à distance. Grâce à un équipement d'enregistrement, des ordinateurs et des projecteurs, les participants de partout peuvent se joindre aux cours par le biais de l'Internet, rendant ces cours plus accessibles à tous, tant au moment de l'enseignement qu'ultérieurement.
In sum, the simplicity in capturing and using GANS, the GANS effective impacts on both human health and enhanced agricultural productivity, learning in one’s own language, and the sharing of Plasma Science knowledge freely without cost to participants have all contributed to the increased Plasma Science learning interests and rising number of class participants among Kenya’s Gĩkũyũ rural communities.	En résumé, la simplicité de la capture et de l'utilisation des GANS, l'impact effectif sur la santé et la productivité agricole, l'apprentissage dans sa propre langue et le partage des connaissances gratuitement pour les participants ont tous contribué à accroître l'intérêt pour l'apprentissage des Plasma Science et à augmenter le nombre de participants aux cours dans les communautés rurales Gĩkũyũ du Kenya.
The following figures show increasing attendance and some of the Gĩkũyũ rural community participants’ learning activities.	Les chiffres montrent l’augmentation de la fréquentation et certaines activités d'apprentissage des participants de la communauté rurale Gĩkũyũ.

Efficient Water Purification System Using GANS
by Mosfeq Rashid

The CuO_2 GANS based water purification system presented in this report extends the results of experiments conducted in Ghana^[1]. The goal is to create an efficient water purification system which is easy to use even under an adverse condition with limited understanding of Plasma Science and Technology. This study was conducted in Bangladesh, where the consumption of contaminated water often leads to many bacteria- and virus-based conditions and stomach problems.

Method

The approach is to create a method to easily purify water using GANS material without directly handling it. It is particularly relevant where the sufficient expertise of GANS has yet to develop and/or urgency of the situation demands an easily manageable implementation.

Système efficace de purification de l'eau par le GANS
par Mosfeq Rashid

Le système de purification de l'eau par le GANS CuO_2 de ce rapport prolonge les résultats des expériences menées au Ghana ^[1]. L'objectif est de créer un système de purification de l'eau efficace et facile à utiliser, même en conditions défavorables et avec une compréhension limitée de la Plasma Science and Technology. Cette étude a été menée au Bangladesh, où la consommation d'eau contaminée entraîne souvent de nombreuses affections par des bactéries et des virus et des problèmes d'estomac.

Méthodologie

Créer une méthode permettant de purifier facilement l'eau par le GANS sans la toucher. Elle est particulièrement pertinente lorsque l'expertise suffisante du GANS n'a pas encore été développée et/ou que l'urgence de la situation exige une mise en œuvre facilement gérable.

Figure 1. The spherical GANS containment unit

Figure 1. L'unité de confinement sphérique du GANS

Portability can become an important consideration under such circumstances.

La portabilité peut devenir une considération importante dans de telles circonstances.

The results from Ghana indicate that the CuO_2 GANS is very effective in dealing with bacteria, viruses, various organic and metallic impurities.

Les résultats du Ghana indiquent que le GANS CuO_2 est très efficace pour traiter les bactéries, les virus et diverses impuretés organiques et métalliques.

Usage

We use a small glass sphere (about the size of a ping-pong ball, as in Figure 1) with a very small amount of CuO_2 GANS in it. The ball hangs from the top on a thin, Nanocoated copper wire, inside an 18-liter container (Figure 2). The container has a tap at 70% mark from the top of it. The water available from city water supply is first poured in the bucket.

Utilisation

Nous utilisons une petite sphère de verre (de la taille d'une balle de ping-pong, voir Figure 1) contenant une très petite quantité de GANS CuO_2 . La balle est suspendue à un mince fil de cuivre nano-enrobé, à l'intérieur d'un récipient de 18 litres (Figure 2). Le récipient est muni d'un robinet à 70 % de sa hauteur. L'eau courante est d'abord versée dans le seau.

The water is ready for consumption after letting the water sit for 12 to 24 hours for the CuO_2 field operation and sedimentation to take effect. The tap on the bucket can then be used to get the purified water out. Given the impurity level of the water in the locality, the bucket is cleaned after an interval of 3 to 4 months.

L'eau est prête à être consommée après l'avoir laissée reposer pendant 12 à 24 heures pour laisser le champ du CuO_2 agir. Le robinet du seau peut alors être utilisé pour faire sortir l'eau purifiée. Étant donné le niveau d'impureté de l'eau dans la localité, le seau est nettoyé après un intervalle de 3 à 4 mois.

Similar to direct contact CuO_2 , the situation, the presence of sediments does not impact the taste of the water because the sphere with GANS maintains the field.

Comme pour le contact direct avec le CuO_2 , la présence de sédiments n'a pas d'impact sur le goût de l'eau car la sphère avec GANS maintient le champ.

Figure 2. The complete assembled water purification unit.

Figure 2. L'unité de purification de l'eau complètement assemblée

L'un des aspects importants de ce design est que la balle de 42 mm est utilisable séparément, elle est portable. L'utilisateur n'a pas besoin de connaître les GANS ou le fonctionnement des champs pour l'utiliser. Elle est un aspect indépendant du système. La forme sphérique n'est pas essentielle, d'autres types de récipients en verre peuvent être utilisés lorsque de telles sphères en verre sont indisponibles.

One of the important aspects of this design is that the ball can be used as a separate reusable unit. A 42mm ball is portable and the user need not to have any knowledge of GANS or plasma field operation to use it. Just ball alone is an independent aspect of this approach. The spherical shape is not essential and other types of glass containers can be used where such glass spheres are unavailable.	
<p>Observations</p> <p>The baseline for this observation is the use of pure GANS without any containment to purify the water. In addition to the glass sphere, plastic containers were also tested to see the change in water taste. We decided to go with glass sphere after a month of observation to ascertain any of the five people detected any change in the taste of the water. The plastic versions of the balls used were not as effective in terms of plasma field transparency. Our experience in other areas of plasma science applications also indicated that glass is much superior to other materials. In fact, we were unable to detect any difference in water's taste when in direct contact with GANS and GANS in glass containment. The results are based on the observation of five people over a period of one month.</p>	<p>Observations</p> <p>La base est l'utilisation de GANS pur sans confinement pour la purification. En plus de la sphère en verre, des récipients en plastique ont été testés pour voir le changement de goût de l'eau. Après 1 mois d'observation, nous avons décidé d'utiliser une sphère de verre pour vérifier si l'une des 5 personnes détectait un changement de goût. Les versions plastiques n'étaient pas aussi efficaces en termes de transparence du champ. Notre expérience dans divers domaines de la Plasma Science a également montré que le verre est bien supérieur aux autres matériaux. En fait, nous n'avons détecté aucune différence dans le goût lorsque l'eau était en contact direct avec des GANS et des GANS en confinement de verre. Les résultats sont basés sur l'observation de 5 personnes sur une période d'1 mois.</p>
Our usual approach is to use tap water as the starting point. After purification, the water acquires a sweet taste to it, which is similar to good spring water. It tastes significantly better than any bottled water one can obtain from any of the local markets. We have discovered a surprising aspect of this process: the purified water from one of the major river tastes tangibly better than purified tap water, although the taste of river water is much worse than tap water at the beginning.	Notre approche habituelle consiste à utiliser l'eau du robinet comme point de départ. Après purification, l'eau acquiert un goût doux, qui est similaire à celui d'une bonne eau de source. Elle a un goût nettement meilleur que toute eau en bouteille que l'on peut obtenir sur les marchés locaux. Nous avons découvert un aspect surprenant de ce processus : l'eau purifiée de l'une des principales rivières a un goût nettement meilleur que l'eau du robinet purifiée, bien que le goût de l'eau de rivière soit bien pire que celui de l'eau du robinet au départ.
<p>Remarks</p> <p>This approach has been in use for over a year using the same ball and the number of people using and remarking on the taste of the water is now in the range of several thousand.</p>	<p>Remarques</p> <p>Cette approche est utilisée depuis plus d'un an avec la même boule et le nombre de personnes utilisant et remarquant le goût de l'eau est maintenant de l'ordre de plusieurs milliers.</p>

PLASMA SCIENTIFIC JOURNAL

Plasma in Agriculture:
CULTIVATION OF CORN
for experimental purposes
Calarasi county, Romania, June - August 2018
By Barbu Constantin, Scientific Association Plasma Romania

Subject
In June 2018, two fields of corn were sown at a distance of 50 meters from each other. One was the control group with no plasma treatment, the other one was subject to plasma technology. The results of this experiment are presented herein.

Abstract
In this experiment, the plasma technology was applied to the cornfield. Prior to sowing, three, 400ml jars of CO₂, GANS and liquid plasma (10ml of GANS, topped up with spring water as in Figure 1) were placed into the ground in a geometric triangle formation, 3 meters apart, with the intention of feeding the plants.

The subject corn culture, together with the control group, were watered with spring water via a drip irrigation system. Twice a week, the experimental group was additionally watered with liquid plasma mixed with spring water, following this schedule:

- Day 1: 250ml of liquid plasma (10% CO₂, 90% ZnO) mixed with 5 liters of spring water.
- Day 2: 250ml of liquid plasma (80% CO₂, 20% CH₄) mixed with 5 liters of spring water.

The above schedule was repeated on a weekly basis until harvest.

Figure 1. Jar with 100 GANS, original system corn drip-irrigation.

Le Plasma dans l'Agriculture : la culture du maïs à titre expérimental

Comté de Calarasi, Roumanie, Juin – Août 2018
Par Barbu Constantin, Scientific Association Plasma Romania

Sujet

En Juin 2018, 2 champs de maïs ont été semés et séparés de 50 mètres. L'un était le groupe de contrôle sans traitement au plasma, l'autre était soumis à la Plasma Technology. Les résultats de cette expérience sont présentés ici.

Figure 1. Jar with CO₂ GANS, irrigation system, corn, and pepper.

Figure 1. Récipient avec du GANS CO₂, système d'irrigation, maïs et piment

Method

In this experiment, the plasma technology was applied to the cornfield. Prior to sowing, three, 400ml jars of CO₂ GANS and liquid plasma (10ml of GANS, topped up with spring water as in Figure 1) were placed into the ground in a geometric triangle formation, 3 meters apart, with the intention of feeding the plants.

The subject corn culture, together with the control group, were watered with spring water via a drip irrigation system. Twice a week, the experimental group was additionally watered with liquid plasma mixed with spring water, following this schedule:

- Day 1: 250ml of liquid plasma (10% CO₂, 90% ZnO) mixed with 5 liters of spring water,
- Day 2: 250ml of liquid plasma (80% CO₂, 20% CH₃) mixed with 5 liters of spring water,

The above schedule was repeated on a weekly basis until harvest.

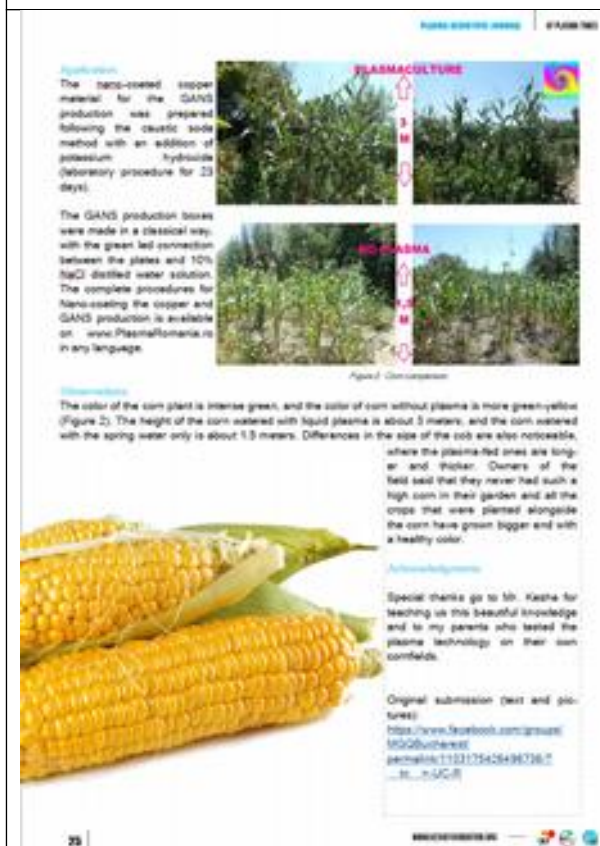

Méthodologie

Dans cette expérience, la Plasma Technology a été appliquée au champ de maïs. Avant de semer, 3 pots de 400 ml de GANS CO₂ et du liquid plasma (10 ml de GANS, complétés par de l'eau de source comme dans la figure 1) ont été placés en triangle dans le sol, à 3 mètres l'un de l'autre, avec l'intention de nourrir les plantes.

Les 2 cultures ont été arrosés avec de l'eau de source par un système d'irrigation goutte à goutte. Deux fois par semaine, le groupe expérimental était en plus arrosé avec du Liquid Plasma mélangé à de l'eau de source, en suivant cette planification :

- Jour 1 : 250ml de liquid plasma (10% CO₂, 90% ZnO) mélangés avec 5 litres d'eau de source,
- Jour 2 : 250ml de liquid plasma (80% CO₂, 20% CH₃) mélangés avec 5 litres d'eau de source,

La planification ci-dessus a été appliquée chaque semaine jusqu'à la récolte.

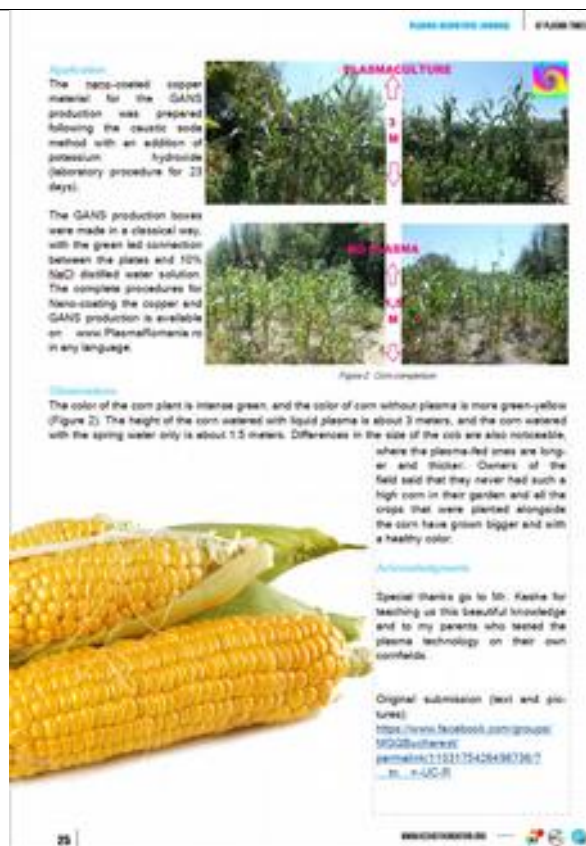

Application

The nano-coated copper material for the GANS production was prepared following the caustic soda method with an addition of potassium hydroxide (laboratory procedure for 23 days).

The GANS production boxes were made in a classical way, with the green led connection between the plates and 10% NaCl distilled water solution. The complete procedures for Nano-coating the copper and GANS production is available on www.PlasmaRomania.ro in any language.

Observations

The color of the corn plant is intense green, and the color of corn without plasma is more green-yellow (Figure 2). The height of the corn watered with liquid plasma is about 3 meters, and the corn watered with the spring water only is about 1.5 meters. Differences in the size of the cob are also noticeable, where the plasma-fed ones are

Application

Le cuivre nano-revêtu pour la production de GANS a été préparé à la soude caustique avec un ajout d'hydroxyde de potassium (procédure de laboratoire pendant 23 jours).

Les récipients de production du GANS ont été fabriquées de manière classique, avec connexion par leds verts entre plaques et solution d'eau distillée à 10% de NaCl. Les procédures complètes (nano-coating et production de GANS) sont disponibles sur <https://plasmaromania.ro/> dans toutes les langues.

Observations

Le plant est d'un vert intense, le plan sans plasma est plutôt vert-jaune (Figure 2). La hauteur du maïs arrosé avec du Liquid Plasma est d'environ 3 mètres, avec l'eau de source seulement d'environ 1,5 mètres. Les différences de taille des épis sont également perceptibles. Avec le plasma, ils étaient plus longs et plus épais. Les propriétaires

longer and thicker. Owners of the field said that they never had such a high corn in their garden and all the crops that were planted alongside the corn have grown bigger and with a healthy color.	du champ ont déclaré qu'ils n'avaient jamais eu un maïs aussi haut et que toutes les cultures qui ont été plantées à côté du maïs ont été plus grandes et d'une couleur saine.

Plasma energy in my car
by F.B. – Mon, June 05th 2017 France

Hi, free energy friends!

Since the end of September 2015, I have made in my car 2 CO₂ Gans balls. After some days I noticed already a more economic use of my car. The longer it is in my car, the more economic. I drive on Highways now 300-400 km more and on second roads 200-300 km more.

In Germany, in October 2015 I was involved in an accident on the highway. Cars were bumped into other cars, next-in front and behind me and I thought: "I do not want that my car breaks down" and from that moment my car took me over "danced" through all the broken cars, it was as a dream and about 300 m later I noticed that the impossible is possible.

Thank you plasma energy!

L'Énergie Plasma et ma voiture
par F.B. - Lundi 05 Juin 2017 France

Bonjour, Amis de la free energy !

Fin Septembre 2015, j'ai fabriqué 2 boules de Gans CO₂ pour ma voiture. En quelques jours, j'ai déjà remarqué un effet. Leurs présences dans ma voiture la rendait plus économique. Je parcours 300-400 kms de plus sur autoroute et 200-300 kms de plus sur routes secondaires.

En Allemagne, en Octobre 2015, j'ai été impliqué dans un accident sur l'autoroute. Un carambolage, devant et derrière moi. J'ai pensé : "Je ne veux pas que ma voiture y plonge" et, à ce moment, ma voiture m'a fait "danser" à travers toutes les voitures accidentées, c'était comme un rêve et environ 300 m plus loin, j'ai remarqué que l'impossible est possible.

Merci à la Plasma Energy !

ABC of publishing in Plasma Scientific Journal

A. Prepare your work

Firstly, you need to prepare. You can either document the work which has already been done and perhaps even presented by you in the testimonials meeting or website, or you can plan a new experiment. You should always **be clear** on what you are trying to achieve and **document everything** as you go (label and take pictures).

B. Write your paper

Gather all the notes and pictures together and when writing your paper **put yourself in the reader's shoes**. Do not assume anything but present everything from the start, explaining every aspect of the experiment, which may not be obvious, and remember that "a picture is worth a thousand words". If needed, relate to other peoples' work by referencing their articles,

Page 27
REJOINS-NOUS !

L'ABC du Plasma Scientific Journal

A. Préparez votre travail

Vous devez vous préparer. Soit documenter le travail qui a déjà été fait et peut-être même présenté par vous lors de la réunion de témoignages ou sur le site web, soit planifier une nouvelle expérience. Toujours **être clair** sur ce que vous essayez de réaliser et **tout documenter** au fur et à mesure (étiqueter et photos).

B. Écrivez votre article

Rassemblez toutes les notes et les images, et pendant la rédaction, **mettez-vous à la place du lecteur**. Ne présumez de rien, mais présentez tout dès le début, en expliquant chaque aspect de l'expérience, qui peut ne pas être évident, et rappelez-vous qu'"une image vaut mille mots". Si nécessaire, établissez un lien avec le travail d'autres personnes en vous référant à leurs

websites or other openly available resources. Start by downloading the Scientific Plasma Journal template and short guide for authors available at https://support.keshefoundation.org/faq.php?section=science-journal&qid=189#q189	articles, sites web ou autres ressources librement accessibles. Commencez par télécharger le modèle du Scientific Plasma Journal et le petit guide pour les auteurs, disponibles ici .
C. Upload and submit Once finished, upload your Word, OpenOffice or PDF file onto one of the cloud or files sharing services, or even onto Facebook. Go to https://support.keshefoundation.org and from the drop-down menu select Plasma Scientific Journal Submissions and press Go . Through this website, you can either submit your work, ask a question or access resources and the FAQs.	C. Envoyer et soumettre Envoyez ensuite votre fichier Word, PDF ou Libre/OpenOffice sur l'un des services de partage de fichiers ou de cloud computing, ou même sur Facebook. Allez ici et dans le menu déroulant, sélectionnez Plasma Scientific Journal Submissions et appuyez sur Go . Sur ce site, vous pouvez soit soumettre votre travail, soit poser une question, soit accéder aux ressources et aux FAQ.
